

## VGA Cable, HD15 Male / Female

These BayLan VGA cables feature 3+9 / 3+4 (-L) 75 Ohm coaxial cables to assure high quality video signal transmission. The fully plastic molded backshells of the HD15 connectors provide a very durable assembly with 2 ferrites cores. The male to female gender configuration allows extension of existing VGA line.

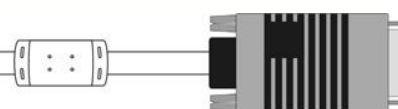

### FEATURES:

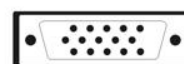

- Video monitor extension cable
- 9+3 75 ohm coaxial cables assure high quality video signal
- Male to Female gender configuration allows extension of existing VGA line
- Fully molded backshells construction is highly durable

HD15 MALE

HD15 FEMALE
