Antenna

8.2MHz RF TA System

In the first stage, the TX board produces a frequency range between 7.2MHz and 9.2MHz, which is transmitted by the TX antenna. When the RX antenna receives the signal, the RX board will amplify, filter and demodulate the RF signal. In the next stage, the A/D will convert the RF signal to DSP. When there are effective 8.2MHz tags/labels passing through, the signal will resonate for the frequency of the tags/labels is same to the field frequency of the system. Such resonance will lead to the distortion of the high-frequency wave, which can be inspected by the RX board and trigger the alarm. This system adopts advanced DSP technology; using DCF digital comb filter to extract tag/label signal among the environment noise. It proposes the correction method to discriminate and execute alarm, which greatly improves system detection rate. The detection range can be as wide as 1.7meter, but the percent of false alarm can be very low.

Among all the similar products, our company's EAS items is in the leading place in Pakistan, and it is also one of the most advanced EAS products in the world.

Performance Advantages:

- 1) Using DSP Technology
- 2) With AGC Technology
- 3) PIT inspection technology
- 4) LED multi-functional display technology
- 5) In supposes can cut two group modulation signals
- 6) High sensitivity and high speed responsibility
- 7) High anti-interference ability and low false alarm
- 8) Easy installation and low power consumption (<15W)

BOSRFDAA30
RF Dual Aluminum System
(Optional Advertisement Display)

Frequency

8.2Mhz Radio Frequency

Detection Range

- Soft Labels 4x4cm : 170cm
- Hard Tags Small Square : 200cm
- Hard Tags Big Square: 220cm

Remarks: Effective rate of detection is influenced by Environment & quality of the tags / Labels used.

Power

220V~50Hz/AC

Power Consumption

Less than 30W

Antenna Dimensions

- Height : 1558mm
- Width : 400mm
- Thickness : 30mm

Material of Antenna

Aluminum Alloy

Alarm Mode

Audible and visual alarm

Imported high-intensity Acrylic

Alarm Mode

Audible and visual alarm

BOSRFDSS01

RF Dual Metal System

Frequency: 8.2Mhz

Detection Range / Aisle Width

-R50 Tag: 140cm

-4x4cm Paper Label : 130cm

Remarks: Effective rate of detection is influenced by environment & quality of the tags / Labels used

Electronic Technology

-Collaborate with the classic, yet the most stable EAS RF sensoring technology.

Detection

-Excellent, reliable detection with minimal false alarms

-Superior EAS detection over a full ranges of security tag types and sizes

Features Design

-The system is engineered to stand up to the toughest environments

-The finish stands up to the wear and tear of retail traffic

002076 

Features :

- Deter Thieves
- Provide a feeling of security for your customers
- Protect your inventory
- Offer completely safe protection for products and people
- An optional crash kit to safeguard pedestals from shopping cart collisions

Antenna Dimensions

-Height : 1670mm

-Width : 320mm

-Depth : 100mm

-Weight : 14kgs

Specifications are subject to change without prior notice with advancement in technology.

BOSAMDHA12

AM Dual Acrylic System

Frequency: 58KHz

Detection Range / Aisle Width

-Pencil Tag: 260cm

-AM Label : 180cm

Remarks: Effective rate of detection is influenced by environment & quality of the tags / Labels used

Electronic Technology

- The digital signal processing allows increasingly precise detection of tags of all sizes
- By combining next-generation digital technology, delivering excellent detection for various configurations to suit any store environment

Detection

- Digital signal processing capabilities ensure superb detection performance
- False alarm immunity

Features Design

- Constructed of transparent, scratch-resistant acrylic, the sensor is engineered to provide virtually transparent protection and to maintain its good look
- Clear, designer look appeals to upscale retailers

002077

Features :

- Meet all retail requirement
- Take advantage of next-generation digital AM performance
- Maximum alarm integrity
- Designed for maximum durability
- Comprised of two pedestals, the primary pedestal contains the power electronics, alarm light and audible alarm and provides power to the secondary pedestal
- The secondary pedestal doesn't alarm either visually or audibly, and operates in conjunction with primary pedestal
- An optional crash kit to safeguard pedestals from shopping cart collisions

Antenna Dimensions

-Height : 1543mm

-Width : 294mm

-Depth : 125mm

-Weight : 13kgs

Specifications are subject to change without prior notice with advancement in technology.

Deactivator

BDARF0022

RF 8.2MHz Digital EAS RF Distance Deactivator

Frequency : 8.2MHz
Primary Input : 100-240VAC. 47-63Hz
Output : 24V DC
Measurement : 243x233x26mm
Weight : 995g
Color Availability : Black (White or Customized on Order)
Operating Temp : -10°C to 60°C (14°F to 140°F)
Relative Humidity : 10%- 80% non-condensing

Key Features:

- Superb label deactivation performance
- Deactivation height: $\leq 30\text{cm}$
- Deactivation Rate: 120 Labels per minute
- Reliable audible and visual indication of deactivation
- Plug and Play Mounting options allow table top or flush mounting

002014

BDAAM0700

AM 58KHz Deactivator

Frequency : 58KHz
Primary Input : 240V 50/60Hz
Measurement : 240x230x5mm
Weight : 240g
Color Availability : Black
Voltage : NA

Key Features:

- Easy to Operate

002015

Specifications are subject to change without prior notice with advancement in technology.

www.baylan.com

BDARF0908A

RF Deactivator with Notice Function

Frequency : 8.2MHz
Measurement : 240x230mm
Weight : 240g
Color Availability : Black

Key Features:

- Deactivation height: ≤30cm
- Scan Width : 7.4 ~ 9Mhz
- Deactivation Rate: 120 Labels per minute

002079

BDARF0908N

RF Deactivator with LED & Notice Function when non-deactivate

Frequency : 8.2MHz
Measurement : 290x240mm
Weight : 1KG
Color Availability : Black

Key Features:

- Deactivation height: ≤30cm
- Scan Width : 7.4 ~ 9Mhz
- Deactivation Rate: 120 pieces per minute

002181

BDARF0908B

RF Deactivator with LED & Notice Function

Frequency : 8.2MHz
Measurement : 235x235mm
Weight : 240g
Color Availability : Black

Key Features:

- Deactivation height: ≤30cm
- Scan Width : 7.4 ~ 9Mhz
- Deactivation Rate: 120 pieces per minute

002188

Specifications are subject to change without prior notice with advancement in technology.

EAS Testers

BTRRF0907

EAS Antenna Frequency Tester

Measurement	: 135x70x25mm
Frequency	: 4 ~ 12MHz
Scan Frequency	: 0 ~ 100KHz
Scan Width	: 0 ~ 4MHz
Tolerance	: $\pm 1\%$
Power Voltage	: 3V
LCD Display	: 6.5cm green screen 2 Language for option (CN/EN) Capable to test centre Frequency(FC), Bandwidth & scanning Frequency(FS).
Weight	: 170g

002081

Hand Verifier

BHVRF0023

RF 8.2MHz Hand Verifier

Frequency	: 8.2MHz
Unit Dimension	: 110x73x35mm
Color	: Gray or Customized
Primary Input	: N/A

Key Features :

- Battery life, Alarm : 24hours
- Detection Distance : Max.20cm
- Buzzer,db at 1Mtr : 70dB
- Buzzer, Alarm : Continuous beep up to 70db
- LED, Alarm : Continuous Flash
- Power ON/OFF method : Keep pressing the START button
- Voltage : 9V

BHVRF0024

RF 8.2MHz Hand Verifier & Deactivator

Frequency	: 8.2MHz
Unit Dimension	: 280x70x33mm
Color	: Black or Customized
Primary Input	: 110-240Vac

Key Features :

- Battery INFO: 1.Rechargeable LI-ON Battery;
 - 2.The battery can be used for two years;
 - 3.The charge time is about 2-3 hours;
 - 4.Can work 500 times;
 - 5.AC/DC adapter included
- Buzzer, db at 1Mtr : The buzzer will keep continuously up to 100db
- LED, Alarm : 1.Red and blue LED;
 - 2.Reliable Audible and visual indication at detection and deactivation
- Power ON method : Keep pressing the START button
- Detection distance : For small square tag or 40x40mm paper label, the distance is 17cm
- Deactivation Distance : For RF 40x40mm paper label, the distance is 15cm
- Voltage : 12V

Specifications are subject to change without prior notice with advancement in technology.

People Counter

BPCDY0039

New Wireless People Counter

Frequency	: N/A
Unit Dimension	: 87x59x27mm
Color	: Black or Customized
Primary Input	: 110-220Vac

Key Features :

- Easy data retrieval by date or by hour
- Counter Management via Windows, no additional software required
- 1.15 inch blue screen LCD display makes it easy on the eyes
- Internal memory capable of storing for up to 500hours (Per hour per entry)
- Replaceable battery operated for a truly wireless installation
- Counts across span up to 4 meters
- Integrated mounting set or optional ABS plastic seat
- Setting & preferences are managed locally by key board on the counter
- LCD screen background- light turn-ON/OFF when only people access
- Power on/off timer for long battery life
- Lower battery indicator on LCD screen
- Two language for operations (English / Mandarin)
- LED indication for weak signal
- Traffic data on desktop display for immediate inquiry
- Capable to be built into EAS Antenna to work together with system
- Tiny shape with excellent performance
- Charge available both by electricity and batter.
- Voltage : 3V

Display Security

BDS1838BFMJT

Multifunctional Secure Display Stand for Camera

Standard configurations and parameters:

- Flat holder
- 1pc of JB-9895 (secure recoiler) per-built inside
- Alarm & LED indication: alarm volume: > 85db
- 1 pc of lithium battery for backup
- 2pcs of alarm switch keys
- 1pc of DC-6V (exterior power adaptor)
- Fitting: 1 pc of JB-56 (magnetic module for camera), 1 pc of setscrew, 1 pc of Allen key, 1 pc of RJ-2(connection wire), 1 set of setscrews
- Standard stand height: 12.50cm
- Color : White / Black

Optional functions and accessories:

J – Metal mounting base & matched adhesive tape

P- Off-hook signal output

H- IR remote control (JB-38 remote key for working together)

T- Secure metal key

M- Holder & matched sensor specifically designed for DSLR

002064

BDS1838BWJTH-2C

Multifunctional Secure Display Stand

Standard configurations and parameters:

- Angled holder
- 1pc of JB-9895 (secure recoiler) per-built inside
- Alarm & LED indication: alarm volume: > 85db
- 1 pc of lithium battery for backup
- 2pcs of alarm switch keys
- 1pc of DC-6V (exterior power adaptor)
- Fitting: 1 pc of JB-58 (electronic sensor) &
1 pc of 3M adhesive tape 1 set of screws
- Standard stand height: 12.50cm
- Color : White / Black

Optional functions and accessories:

J – Metal mounting base & matched adhesive tape

P- Off-hook signal output

W- Angle adjustable holder

C- Charger functions for displayed merchandises (JB-58C or JB-58-2C sensor for working together).

H- IR remote control (JB-38 remote key for working together)

T- Secure metal key

APPLICATION GUIDE

ALARM SECURED

STEP.1 EQUIPMENTS REQUIRED

ALARM SECURED WRAPS; SUPER DETACHER; A PEN WITH NEEDLE HEAD

STEP.2 PRECHECK THIS DEVICE

Default setting: the mechanical lock was set open and could be turned clockwise or anticlockwise; power was on; the LED indicator light flashes once every six seconds; the buzzer won't alarm, until the product cable was cut.

STEP.3 LOCK

If need to lock the product, press the red lock-button as the arrowhead way till you heard a warning tone "ka". After locking, the product could only be turned clockwise and shrink the cable, the warning tone "ka-ka" sounds when turning.

STEP.4 UNLOCK

If need to open the lock, put the lock point of the product onto the center part of a detacher, the red lock will be unlocked automatically. After unlocking, the product could be turned clockwise to shrink the cable or anticlockwise to spread the cable.

STEP.5 ACTIVATE / DEACTIVATE

The self-arming function only work after activating. Use a needle or pen to push the "RESET" hole till a warning sound alarm to activate the product, after activating, the red LED light will flash every 6 seconds. If need to close the self-arming function or stop the alarming, you should deactivate the product. Use a needle or pen to push the "RESET" hole till the red LED light stop flashing.

BATTERY INFORMATION

A.the product is not reusable, please change a new one when the cable was cut off or battery exhausted.

B.if the battery is enough, the LED light flash every 6 seconds; if the battery is low, the LED light flash frequently.

C.the product is able for 15 minutes continuous alarming, and also workable after the alarming was ceased.

Specifications are subject to change without prior notice with advancement in technology.

IDENTIFYING THE PARTS

- | | |
|---------------------------|-----------------------------|
| A. Lock Plunger | D. Red LED Indicator |
| B. Magnetic Clutch | E. Reset Key |
| C. Buzzer | F. Control Panel |

PRECHECK THIS DEVICE

- Prior to the shipment:
- A. The Battery Power is set as ON in the factory;
- B. The Locker is set as OPEN in the factory;
- C. The Control Panel could be turned either clockwise or anticlockwise;
- To precheck the tampered-with alarm, use a pin to click the Reset Key. The Audio Indicator will alarm, and the Visual Indicator will flash, until the click on the Reset Key is released.

BATTERY INFORMATION

- The unit uses Lithium button type batter CR2032.
- The unit's battery power is set in an OFF status before the shipment in the factory. To stick a pin shaft into the reset hole for about 3 seconds to activate the unit and you could also stick the reset hole for about 10 seconds to shut it off.
- The unit is reusable. Please change the battery, when the battery runs out.
- The red LED indicator flashes every 6 seconds, when the battery power is sufficient; the red LED indicator flashes every 1 second, when the battery power is low.
- The Speaker emits an audio indication as 'DEE' every 1 minute, when the batter power is low.
- The battery power supports over 30 minutes continuous alarm, when the unit is being applied freshly.

VISUAL INDICATION

- The red LED indicator flashes every 6 seconds, when the battery power is sufficient; the LED indicator flashes every 1 second, when the battery power is low.
- The red LED indicator flashes continuously, when the unit is tampered with(the cable is cut).

AUDIO INDICATION

- The speaker alarms at about amplified 100dba, when the unit is tampered with (the cable is cut).

LOCK / UNLOCK

When apply this unit, press the red Locker as the direction showed, until it is clicked. Turn the Control Panel clockwise, until this unit is securely fastened.

LOCK

A strong magnetic detacher is required. Apply the strong magnetic detacher onto the Magnetic Clutch and make them contacted. The red Locker will be released afterwards. Turn the Control Panel anticlockwise to release the cable to unfasten the merchandise.

UNLOCK

ACTIVATE / DEACTIVATE

- The Alarm function when tampered with, is activated prior to shipment in the factory.
- To deactivate the alarm, please use a pin to click the Reset Key, till the audio indication is stopped.

PARTS

- | | |
|--------------------|------------------------|
| A. Magnetic Clutch | E. Rotatable Top Plate |
| B. Buzzer | F. Battery Box |
| C. LED (Red) | G. Reset Button |
| D. Lock Plunger | H. Bottom Plate |

GET STARTED

When keep pressing the reset button, the buzzer will alarm continuously and the red LED will flash continuously; When release the reset button, the buzzer will stop alarming and the red LED will flash every 6 seconds. When the AS1008 is alarming, press the reset button, and the alarming will stop and when release the reset button the AS1008 will be back to the normal working status.

CHANGE BATTERY

Open the battery box with a screwdriver, then place a battery into it.

SET UP LOCK STATUS

Place the lock on a magnetic detector which the magnetic force is more than 6,000GS, the AS1008 will be unlock automatically. The rotatable top plate is

able to rotate clockwise or the reverse.

Press the lock plunger following the direction of the arrow, the top plate can rotate clockwise only.

APPLICATION

Release the cables, place the four cables around the four sides of the item being protected.

Place the item on the bottom plate, press the lock plunger, then rotate the top plate clockwise, until it is locked tightly.

Battery Information

- A. This product can be used repeatedly, please replace a new battery, when the battery is used out.
- B. The LED flashes every six seconds, when the battery is low.
- C. The LED flashes every one second, and also the buzzer beeps once every minute, when the battery is low.

Specifications are subject to change without prior notice with advancement in technology.

ABOUT THE ALARM SECURED MOUSEGUARD-AS1009

It gives retailers three levels of merchandise protection. An early detection alarm alerts the store personal, when the product is being tampered with inside the store. The alarm will also sound, when the EAS system is triggered by the merchandise's leaving from the store. And the merchandise is attempts to leave the store, the units will also self alarm.

A. Lanyard clip B. Speaker
C. Red LED indicator D. Security lock

APPLY THIS UNIT

Loop the lanyard through a non-removable portion of the merchandise. Push the clip into the tag housing

REMOVE THIS UNIT

To remove it from merchandise, place the magnetic detacher onto the security lock, slide the lanyard out of the tag housing

KEY FEATURES

Tampered with Self Alarm

The unit will alarm, when the product is being tampered with. The alarm will not be deactivated, until the battery runs out.

Triggered Self Alarm by going through EAS system

If the merchandise attempts to leave the store through an EAS system, the units will also self alarm. The alarm could only be deactivated, when the unit is being placed STILL for 30 seconds.

Red LED indicator

The Red LED indicator flashes every 5 second, when battery in normal status, and flashes every 1 second for low battery status.

Specifications are subject to change without prior notice with advancement in technology.

PARTS

- A. Lock Plug
- B. Lock Hole
- C. Lock
- D. Cable
- E. LED
- F. Buzzer
- G. "M" shape Socket

ACTIVATION

When insert the lock plug(A) into the lock hole(B), the 'M' shape socket(G) on both lock plug(A) and lock hole(B) should meet. The AS1010 beeps once and the LED(E) will flash once, then the AS1010 is activated. The self alarm protection is armed.

DEACTIVATION

Place the lock(C) of the locked AS1010 on the center of the magnetic detacher, hold the cable(D) on the side of the lock plug(A), take the lock plug(A) off from the lock hole(B). Then the AS1010 is deactivated. The self alarm protection is disarmed.

BATTERY INFORMATION

1. When the self alarm protection of AS1010 is armed, if the LED(E) flashes once every 6 seconds, the battery power is OK; If the LED(E) flashes once every second, and the buzzer(F) beeps once every minute, the battery power is low;
2. When the self alarm protection of AS1010 is disarmed, the LED(E) does not flash, then the battery power information won't be available.

LED INFORMATION

1. When the self alarm protection of AS1010 is armed, and the self alarm is triggered, the LED(E) will flash continuously;
2. When the self alarm protection of AS1010 is disarmed, the LED(E) will not flash;
3. LED for the battery information, please check the "BATTERY INFORMATION".

BUZZER INFORMATION

1. When the self alarm protection of AS1010 is armed, and the self alarm is triggered, the buzzer(F) will alarm continuously in a volume up to 100dB.
2. Buzzer for the battery information, please refer to the "BATTERY INFORMATION"

Specifications are subject to change without prior notice with advancement in technology.

PARTS

- A. Lock
- B. LED
- C. Buzzer
- D. Reset Button

SELF ALARM TEST & DISALARM METHOD

Keep pressing the reset button, the buzzer will alarm continuously, and the LED will flash continuously, until the pressing on the Reset Key is released; Meanwhile, applying a click on the reset button, the selfalarm of the tag will be turned off.

BATTERY INFORMATION

1. When the self alarm protection of AS1012 is armed, if the LED, flashes once every 6 seconds, the battery power is OK; If the LED flashes once every second, and the buzzer beeps once every minute, the battery power is low;
2. The self alarm protection is activated before leaving factory;
3. The battery is irreplaceable, please dispose when the battery is use out.

LED INFORMATION

1. When the self alarm protection of AS1012 is armed, and the selfalarm is triggered, the LED will flash continuously;
2. LED for the battery information, please check the "BATTERY INFORMATION".

BUZZER INFORMATION

1. When the self alarm protection of AS1012 is armed, and the selfalarm is triggered, the buzzer will alarm continuously in a volumn up to 100dB;
2. Buzzer for the battery information, please refer to the "BATTERY INFORMATION".

Specifications are subject to change without prior notice with advancement in technology.

PARTS

- A.** Tag Body
- B.** Buzzer
- C.** LED(Red)
- D.** Reset Button
- E.** Pin

SELF ALARM TEST & DISALARM METHOD

When keep pressing the reset button, the buzzer will alarm continuously and the red LED will flash continuously; When release the click on the reset button, the buzzer will stop alarming and the red LED will flash every 5 seconds. When the AS1017 is alarming, by clicking the reset button, the alarming will stop. Then the AS1017 will work normally again.

APPLYING

Please use the AS1017 with a hard tag (clutch), pull the AS1017 (with the strength about 10kgs), the AS1017 will alarm and the LED will flash continuously.

The AS1017 will alarm and the LED will flash, when passing through the EAS gate (AM 58KHZ/RF 8.2MHZ)

DETACHING

Place the tag (clutch) on a suitable magnetic detacher, then take the AS1017 off from the tag.

Battery Information

- A. The battery is irreplaceable, please dispose when it is use out.
- B. The LED flashes 5 times per second when battery power is OK.
- C. The LED flashes 1 times per second when the battery is low.

HARD TAG

EQUIPMENT NEEDED IN USING

EAS HARD TAG, CONE PLASTIC PIN,
MAGNETIC DETACHER

DETACH THE PIN

A magnetic detacher is needed to detach the pin from the hard tag.

1. Put the extrusive part of the hard tag onto the center of the magnetic detacher, let the blue plastic part of the pin face to yourself.

2. Use your finger to hold the plastic part of the pin, take the pin out from the hard tag. Detaching process is then to be completed.

HOW TO PROTECT THE COMMODITIES

One EAS hard tag and cone plastic pin for one commodity. Please make sure the hard tag and pin are separated.

1. Choose a part on the commodity, put the cone plastic pin across this part.

2. Use a hard tag, let the part which has a needle hole to face the pin.

3. Insert the pin shaft into the needle hole of hard tag, till the tag and pin are completely closed.

Optical Tag

STEP1. GETTING STARTED

Before using the optical tag, the lock with rubber cushion should be in an open position.

STEP2. SETTING THE LOCK OPEN

To set the rubber cushion in an open position, please use the detacher DT4002. Insert the screw driver's metal head into the lock slot on the tag. Rotate the screw driver anticlockwise to set the rubber cushion into total open position.

STEP3. APPLYING THE OPTICAL TAG

When the rubber cushion is set in the open position, insert the glasses feet into the gap on the locking structure. To keep the comfort for a customer try-on, moving the optical tag close to the glasses frame is suggested.

STEP4. SETTING THE TAG LOCKED

To set a lock for the tag with an eyewear, please use DT4002 detach. Insert the metal head of the detacher screw driver into the lock slot. Rotate the DT4002 clockwise, until the rubber cushion is fully closed.

Detacher

IDENTIFYING THE PARTS

- A. Lid lock B. Security lid
C. Magnetic body D. Extension neck
E. Magnetic body seat

RECESSING THE DEVICE

1. Reassembling the detacher

Disassemble the unit into parts, reassemble the part C with part D, engage the part D in a proper position on the part C to make the length of part D in accordance with the depth of the cash counter. (holes drilled in advance)

2. Building the unit into the cash counter

Locate the unit into the pre-set hole on the cash counter.

3. Fixing the device with the cash counter

Apply the part E onto the device from the back of the cash counter, and fasten it firmly by a clockwise spin. If the cash counter is with a thin depth panel, remove the part D, then repeat the procedures above.

MOUNTING THE DEVICE

1. Reassembling the detacher

Disassemble the unit into parts, then assemble the part C with the part E.

2. Mounting the detacher onto the cash counter

Mount the unit with screws onto the cash counter by the screws on the bottom. (holes drilled on site)

USING A DETACHER LID

1. Applying a detacher lid to disfunction a detacher

Assemble the part A and part B, then position the unit onto the detacher's magnetic panel.

2. Locking the detacher lid with the detacher

Make a push on the part A to release it from the detacher lid

Safer

IDENTIFYING THE PARTS

A. Security lock

B. Security tap

C. U-shape cut

D. Slot for optional hanger

E. Optional display-hanger

F. Locking panel

SETTING THE LOCK OPEN

Open the safer case by applying the part A onto a magnetic detacher, slide the part B to the right in the same time.

UNFOLDING THE SAFER CASE

Hold the safer case with its locking panel facing you, place one finger at either left or right side of the safer case in the U-shape cut and the thumb in the U-shape cut in the middle of the locking panel. Then open the safer case with a gentle push by the thumb.

INSTALLING AN OPTIONAL HANGER

For using with the hanging-display merchandise, install the optional hanger by pushing the part E into the slot on the safer case until it is clicked.

SETTING A LOCK FOR THE SAFER CASE

Fully close the safer case, slide the part B to the left until it is clicked.

PIN

MOST REQUIRED COLOR FOR PRODUCTS WITH PLASTIC HOUSING

Before you identify the color, you may know a minor color difference might be existed in products you received between different shipments due to the tolerance occurred in injectoin process.

The most required color is illustrated as below:

NOTES ON MAGNETIC DETACHING FORCE FOR MAGNETIC DETACHER

Magnetic detaching force

As there are various definitions upon "Standard Detacher" and "Super Detacher" in different markets around the world. Its necessary to have more universal way to distinguish different detacher so we have categorize different detachers according to its magnetic force as below:

NOTES ON DISTINCTION BETWEEN SUPER LOCK AND NORMAL LOCK

Company divides Super lock and Normal lock through the character of spring used in lock structure which is defined as bellow:

The Spring Torque of Normal Lock should no less than 3 NM

The Spring Torque of Super Lock should no less than 5 NM

NOTES ON PIN SHAFT FOR PRODUCTS WITH PIN

Pin shaft

Product with pin could have different pin shaft types as smooth type, serrated type and super tag pin type.

Smooth Pin type is designed for extremely sensitive merchandise, will not damage delicate fabric; the smooth type pin might be detached by spin and pull.

Serrated Pin type is designed with the improvement to deter the attempt of detaching the pin by spin and pull; the serrated pin might not be compatible for some extremely sensitive, delicate merchandise.

SuperTag Pin type is designed with a unique serrated pin shaft to function with SuperTag for securing a merchandise; the SuperTag pin might not be compatible for some extremely sensitive, delicate merchandise.

NOTES ON LANYARD LENGTH FOR PRODUCTS WITH LANYARD

Lanyard length

The effective length of lanyard mentioned in our production description is defined as the visible part of the lanyard including the loops and pin illustrated here.

NOTES ON PIN LENGTH FOR PRODUCTS WITH PIN

Pin length

The pin length mentioned in our product description is defined as the visible part of pin shaft which has been illustrated here.
