

BTRUWSS184

RFID UHF Silicon Soft & Thin Laundry Tag

The Tag is specially designed for the washing of bed cloth and working wear. It is encapsulated by environmentally-friendly and soft silica gel, and there is a micro chip module in this tag which is applicable for every kinds of washing environment. The tag meets the demand for rotary ironing and it can be sewed on the cloth.

The tag offers good resistance against high temperature (tunnel finisher) and harsh conditions of various cleaning methods (dry cleaning processes). It meets the extreme demands of rotary ironing and can be fixed onto any fabric using heat sealing machine.

SPECIFICATIONS:

Chip	: Alien Higgs-3
Frequency	: 860-960MHz
Protocol Standard	: ISO 18000-6C
Read/Write Endurance	: 100,000 times
Operating Temperature	: -20°C to +55°C
Material	: Silicon
Feature	: Contactless
Washing Method	: Laundry, Dry Cleaning
Weight	: 5g
Dimension (LxWxT)	: 102mm x 16mm x 1.6mm

APPLICATIONS:

- Encapsulated by Silicon Technology
- Can be stitched and blanched
- Can be hanged on towel and apparel for inventory
- Suitable for both Laundry Dry-Clean and washing in water

Specifications are subject to change without prior notice with advancement in technology.
