

How to support 64bit OS

(Your H4 should be with 6 USB ports)

1. Install the patch of multi user to your server.
2. Install NetPoint64bit.
3. If necessary, update firmware and kernel to the latest one.

The patch name:

2008R2: universaltermsrvpatch_20090425

Windows 7 64bit: concurrent RDP patcher

Multipoint Server 2011: (no need patch)

(We don't support other 64bit OSs.)

Please search the above said patch on google, and then download and install.
