## II. Attention

➤ If run this software at Windows XP, please download and install “.net framework4.0 ” .

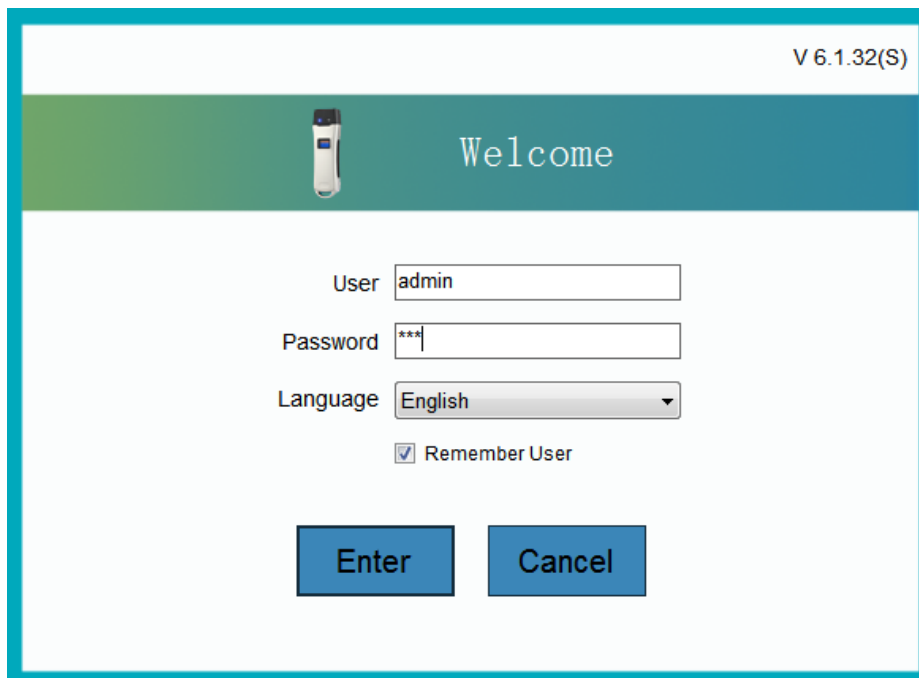

If run at Windows 7 or above ,please ignore it because it is included in operation system .

## III. Software operation

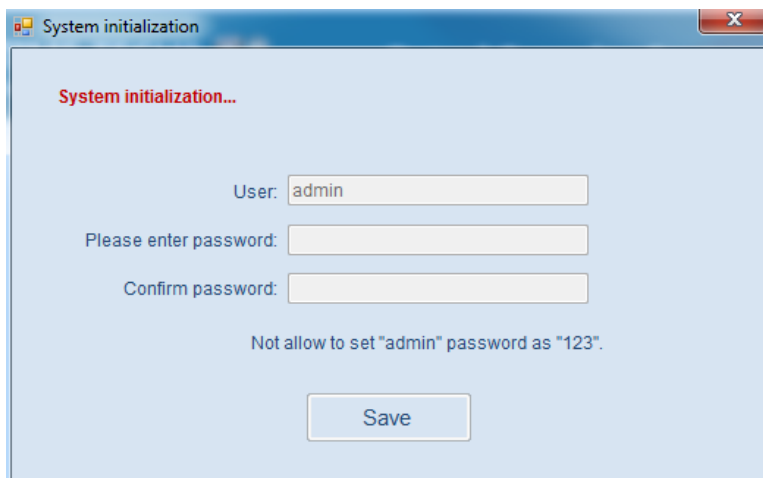

### 1. Log in

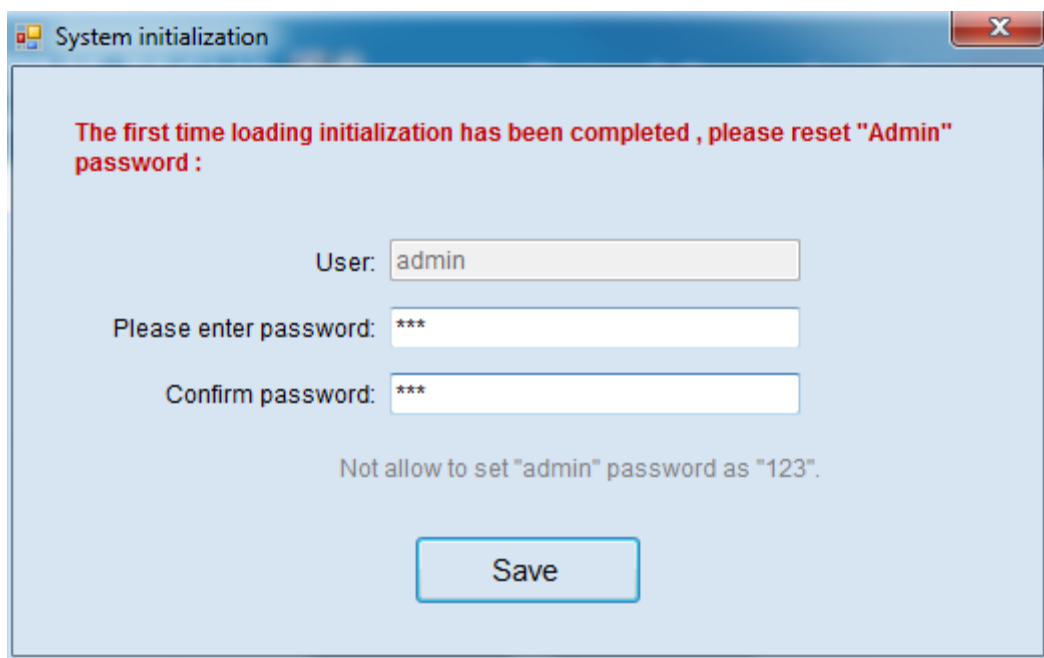

Double click “PatrolCS.exe” , go to log in interface .The original user name is “admin”, default password is “123”.

Notice: When the first time to run the software, system will initialize the database. At the same time, it will ask to set super manager's password .

A screenshot of a Windows-style dialog box titled "System initialization". The dialog has a blue header bar with a close button (X) in the top right corner. The main area has a light blue background. At the top, it says "System initialization...". Below this, there are three input fields: "User:" with "admin" entered, "Please enter password:", and "Confirm password:". Below the password fields, there is a note: "Not allow to set 'admin' password as '123'.". At the bottom, there is a "Save" button.

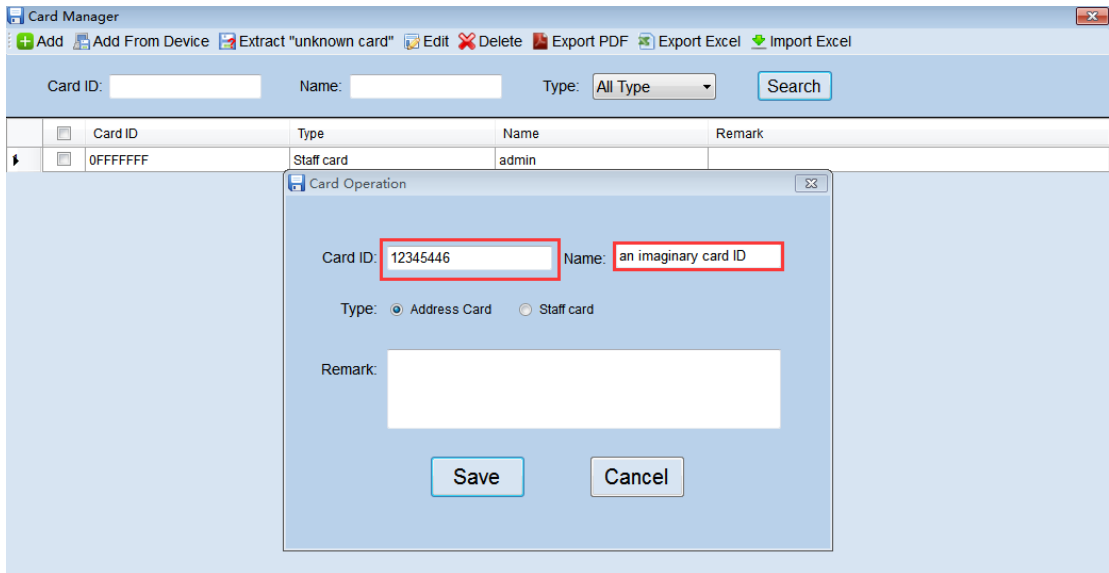

A screenshot of the same "System initialization" dialog box, but after the first initialization. The title bar and close button are the same. The main text now says: "The first time loading initialization has been completed , please reset 'Admin' password :". Below this, the "User:" field still has "admin". The "Please enter password:" and "Confirm password:" fields now contain three asterisks (\*\*\*). The note "Not allow to set 'admin' password as '123'." is still present. The "Save" button is at the bottom.

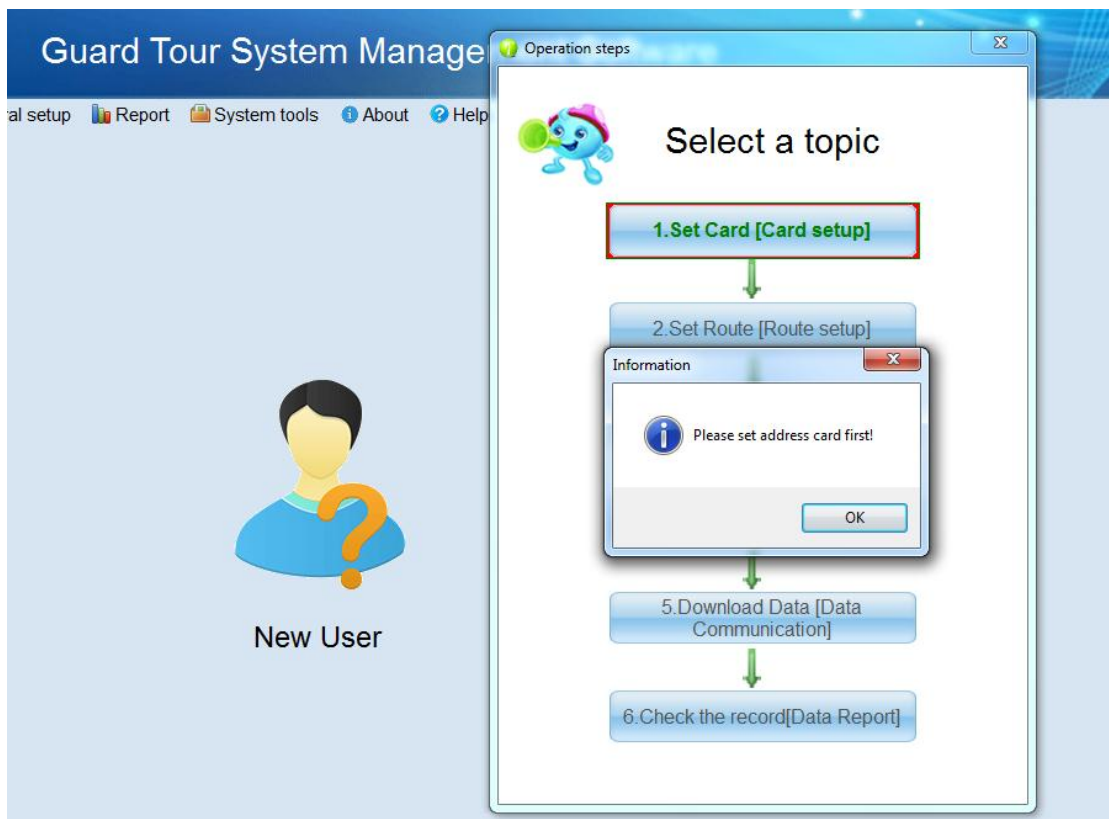

## 2. New User

➤ When you go to Home page at the first time, system will automatically guide you to **New user** page, it will ask you to set card first "Please set address card first !", click this button to go to [Card setup] page, this prompt will disappear only if you finish card setting work at this page . **If you just want to test software, you can type an imaginary card ID (8 characters) and route name. As below:**

---

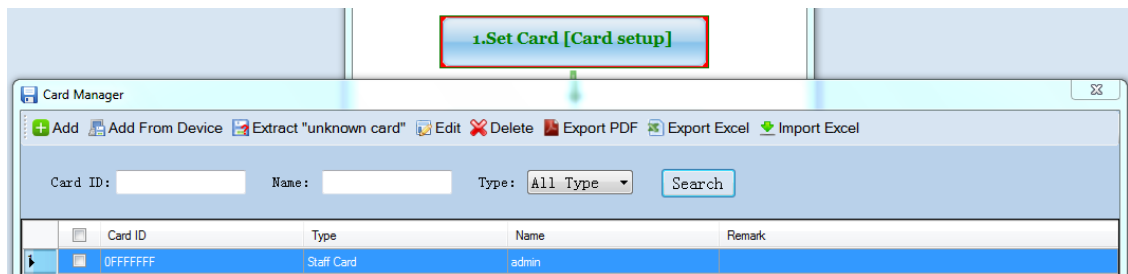

**Note :** This is to be sure the most important settings in software had been done in advance in case you have to back to this page for setting and save much your time .

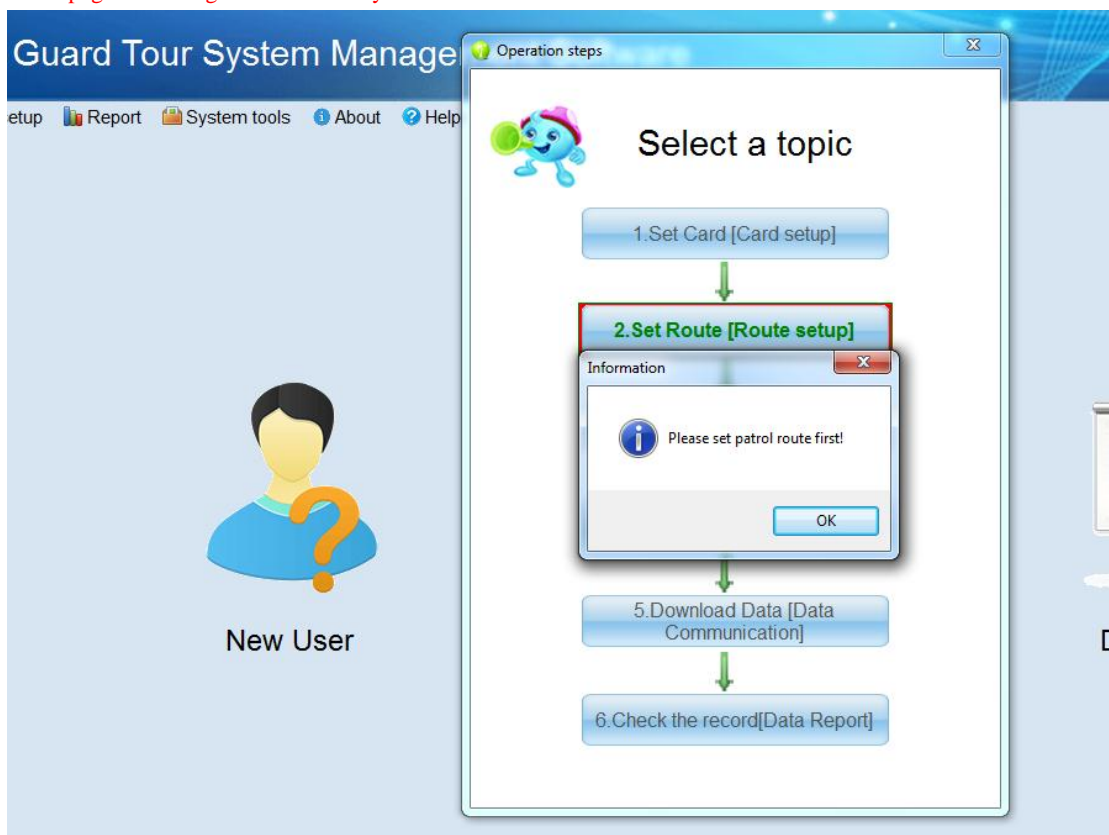

Click “ 1. Set Card [Card setup]”to go to **Card Setup** for card settings page.

You can click “Add”  to add several card manually for testing . If there are card scanned and stored in patrol device , you can click “Add from device ”  to add in batches .

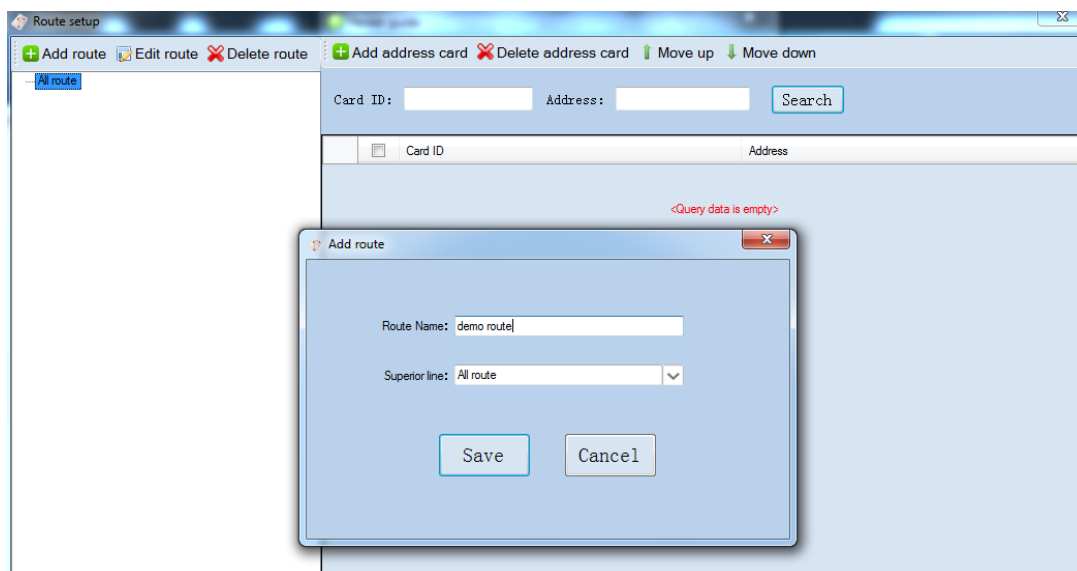

When you finish card adding work , software will guide you to “route setup ” settings . Click this button to go to [Route setup] page, this prompt will disappear only if you finish route settings at this page .

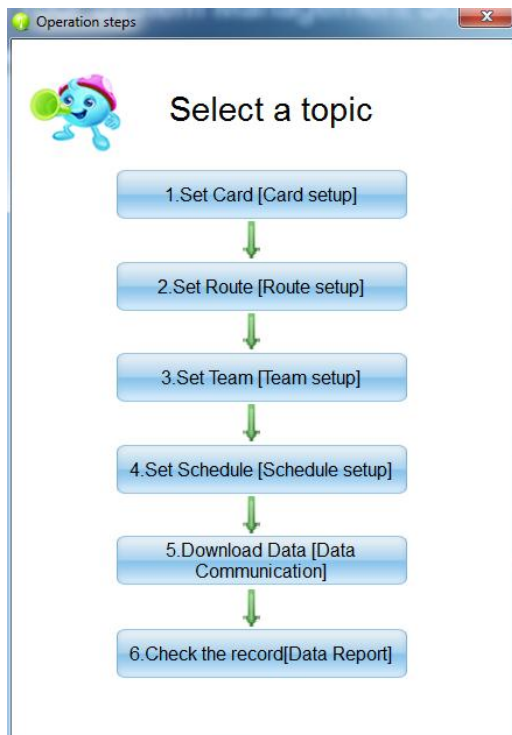

**Note :** This is to be sure the most important settings in software had been done in advance in case you have to back to this page for setting and save much your time .

Click “Set Route [Route setup]” to go to route setup page.

After you finish card settings and route settings ,then you can do other settings or go to other interface. You can follow the steps with the order in “Newer guide” to finish all software operation .

➤ Card setup : You can set card information (check point , staff ID card , event card )here .

- Route setup : You can set route information here (arrange check point to related patrol route )
- Team setup: You can assign staff to related patrol team .
- Schedule setup: Set patrol plan here
- Download data : You can download data via this interface
- Data report : You can check all data report here

### 3. LOGO title

- Show logo and name

- Show current user

- You can change password from pull-down list
- Type in password (old one) -> type in new password ,confirm password-> save ,finished

 A screenshot of a "Change Password" dialog box. The dialog has a brown title bar with a white icon of a padlock and the text "Change Password". The main area is light blue and contains three text input fields, each with a label to its left: "The old password:" followed by a field containing "\*\*\*\*\*", "The new password:" followed by a field containing "\*\*\*\*\*", and "Confirm password:" followed by a field containing "\*\*\*\*\*". At the bottom of the dialog are two buttons: "Save" and "Cancel".

➤ Click user current user name ,you will see log out mould. If click” log out” , interface will back to log in page .

#### 4. Navigation bar

➤ Click navigation bar, system will go to these page

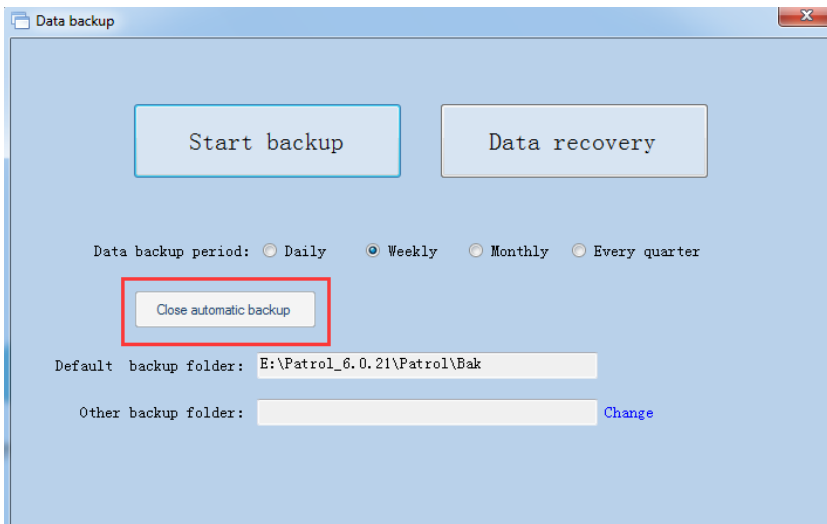

#### 5. Home page display

- Newer guide: General setup steps
- Data communication : Go to Communication Program
- Data report : Query all data and report

Notice : When you log in software at the first time, system will default open database backup, you can close auto-backup manually at “Data base” page manually (as below picture ), then software home page will suggest you to open automatic backup every time when you go to home page.

## 6. Data communication

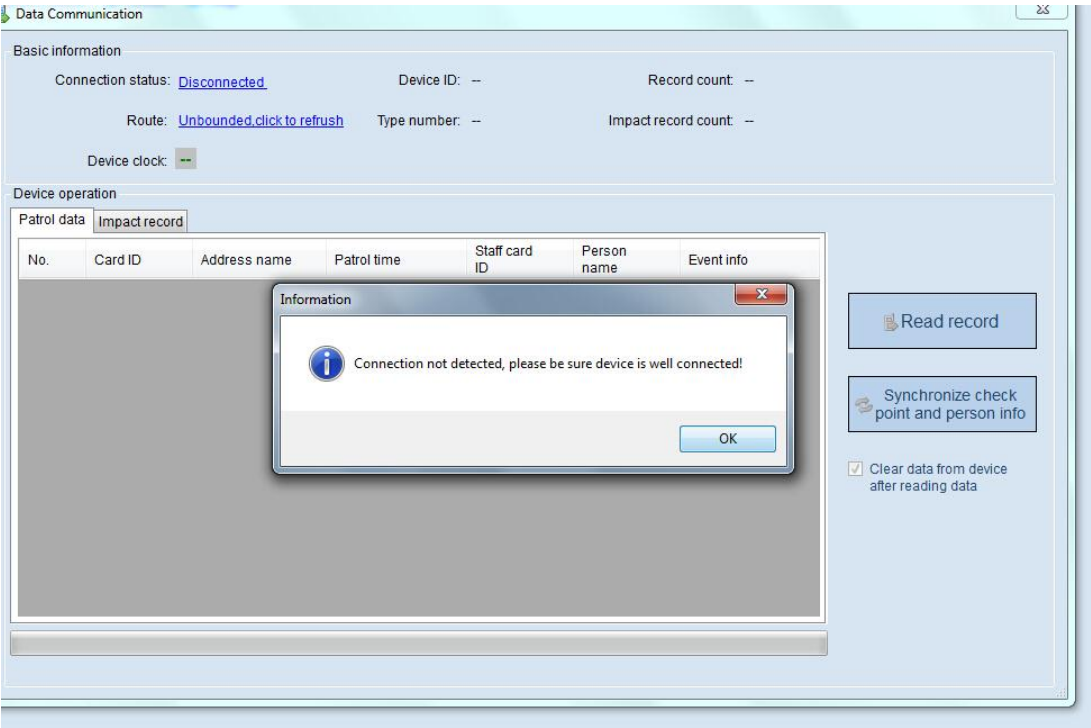

1. Click data communication , you can download data here.

2.Communication page (**Basic series device**)

If software not detect patrol device , system will prompt “ Connection not detected , please be sure device is well

connected ! ”, please connect device well with computer for communication .

➤ When the patrol device connect with software at the first time , software will ask you to bind patrol device to software . Please select a patrol route to bind patrol device to .

Once device is successfully bound to software, you will see prompt box “OK” .

#### Basic information:

- Connection status : If device connection status changed, please click “ disconnected ”to refresh device

connection status .

- Device's basic information : Device ID , device type number , record count (patrol logs amount stored ) , route (which patrol route this device work for) ,impact record ( the impact amount stored) .
- Clear data from device after reading data : Software will clear all data from device automatically after reading data .
- If there is impact record stored in device , data will show here when you click “Impact record” . If no impact record generated , there will be empty .

**Data Communication**

Basic Information

Connection status: [Well connection](#) Device ID: 1 Record count: 17

Route: [Demo](#) Type number: 00010401 Impact record count: 6

☐ Clear data from device after reading data

**Read record**

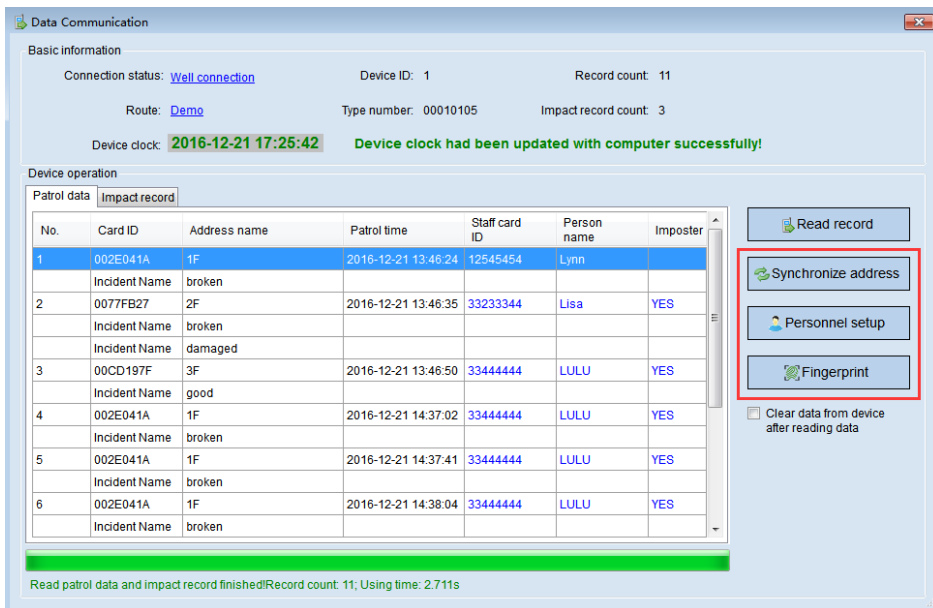

Read patrol data and impact record finished!Record count: 17; Staff card quantity: 0; Using time: 0.148s

If you tick “Clear data from device after reading data , software will clear data automatically from device . **Please be careful with this step, data will not be recovered to device .**

### Fingerprint type device :

Basic function of this type device are the same , in addition ,there are other function : Synchronize address, Personnel setup and Fingerprint .

**Fingerprint :** This are for fingerprint ID binding with staff and cancel binding operation . 2 parts fingerprint contained : Manager’s fingerprint and Inspector’s fingerprint .

Fingerprint

Manager

Fingerprint ID	Subordinate personnel	Remark	Action
0	Tom	Right thumb	<a href="#">Cancel binding</a>

Inspector

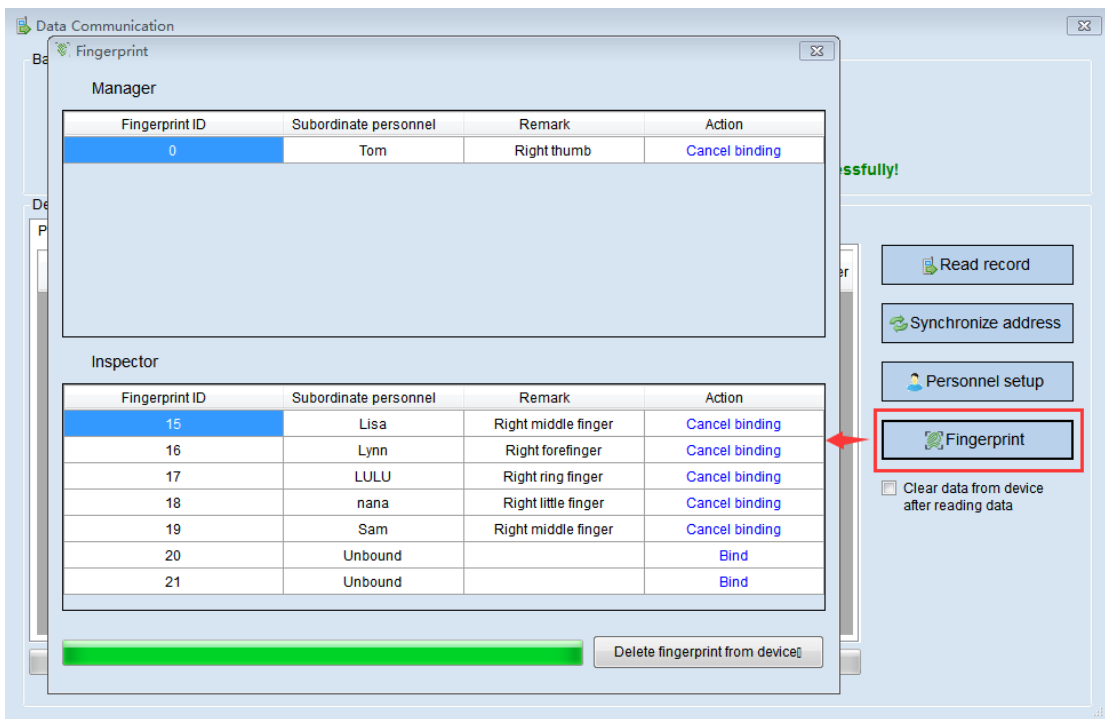

Fingerprint ID	Subordinate personnel	Remark	Action
15	Lisa	Right middle finger	<a href="#">Cancel binding</a>
16	Lynn	Right forefinger	<a href="#">Cancel binding</a>
17	LULU	Right ring finger	<a href="#">Cancel binding</a>
18	nana	Right little finger	<a href="#">Cancel binding</a>
19	Sam	Right middle finger	<a href="#">Cancel binding</a>

Delete fingerprint from device

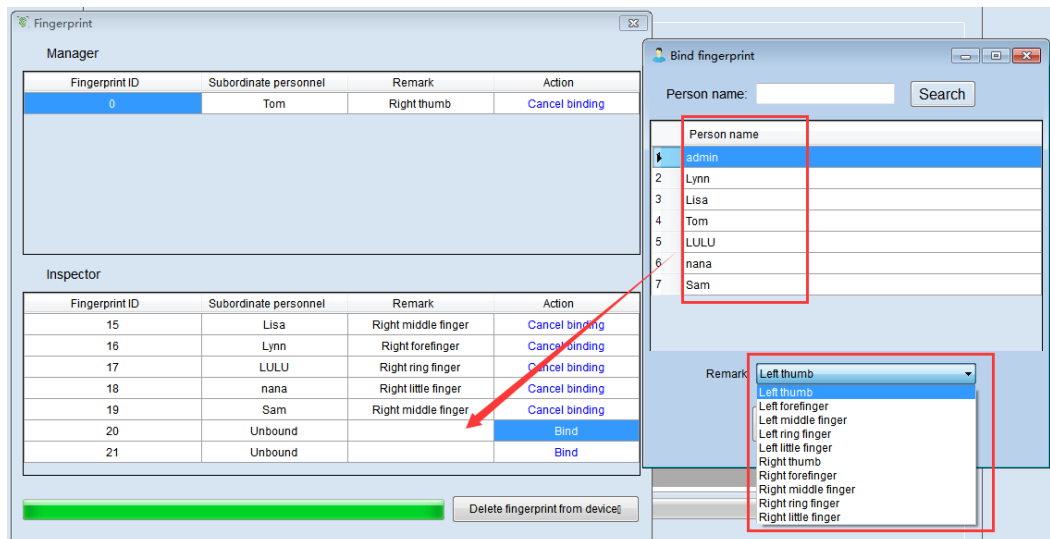

### How to bind fingerprint to related person ?

1. Click “Fingerprint” , software will download all fingerprint ID from device to software , and all registered fingerprint ID and unbound fingerprint ID will be all displayed .

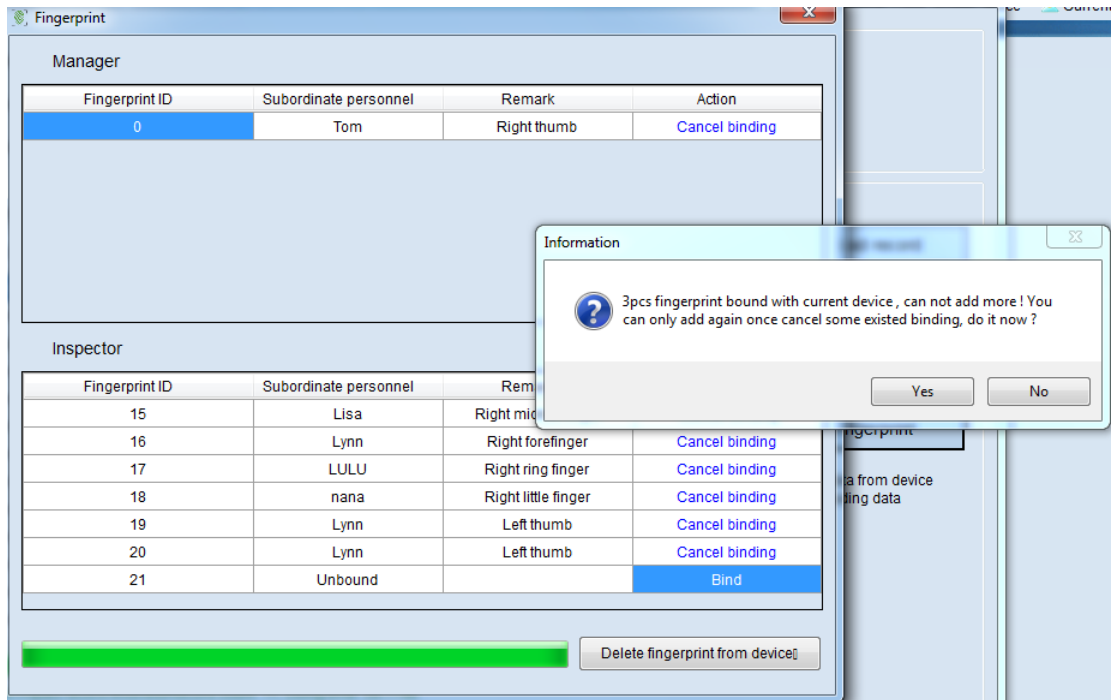

- Click "Bind" to add person (person's name are from the staff card list what user preset )and their fingerprint (as remark) to bind with fingerprint ID.

Every person can be bound with 3 pcs fingerprint maximally , when you bind the fourth finger for selected person, software will show "3pcs fingerprint bound with current device , can not add more ! You can only add again once cancel some existed binding, do it now ?

### How to cancel fingerprint binding ?

Click “cancel binding”, fingerprint ID will be removed from existed person

**Fingerprint**
✕

**Manager**

Fingerprint ID	Subordinate personnel	Remark	Action
0	Tom	Right thumb	<a href="#">Cancel binding</a>

**Inspector**

Fingerprint ID	Subordinate personnel	Remark	Action
15	Lisa	Right middle finger	<a href="#">Cancel binding</a>
16	Lynn	Right forefinger	<a href="#">Cancel binding</a>
17	LULU	Right ring finger	<a href="#">Cancel binding</a>
18	nana	Right little finger	<a href="#">Cancel binding</a>
19	Lynn	Left thumb	<a href="#">Cancel binding</a>
20	Unbound		<a href="#">Bind</a>
21	Unbound		<a href="#">Bind</a>

Delete fingerprint from device

The same person can be bound with 3 pcs fingerprint ID maximally, BUT PLEASE NOT person type can't be mixed . For example , if TOM is bound to “Manager” type , he can't be bound to “Inspector ” type , rest 2 pcs ID of TOM can be also bound as “Manager”.

## 7. Report

Click “Data Report “, you can see all report and result here . Including “ Raw data”, “Data result”, “Data count” , “Data analysis ”, “Impact record” , “Data count report” and “Camera report”.

## 8. General setup

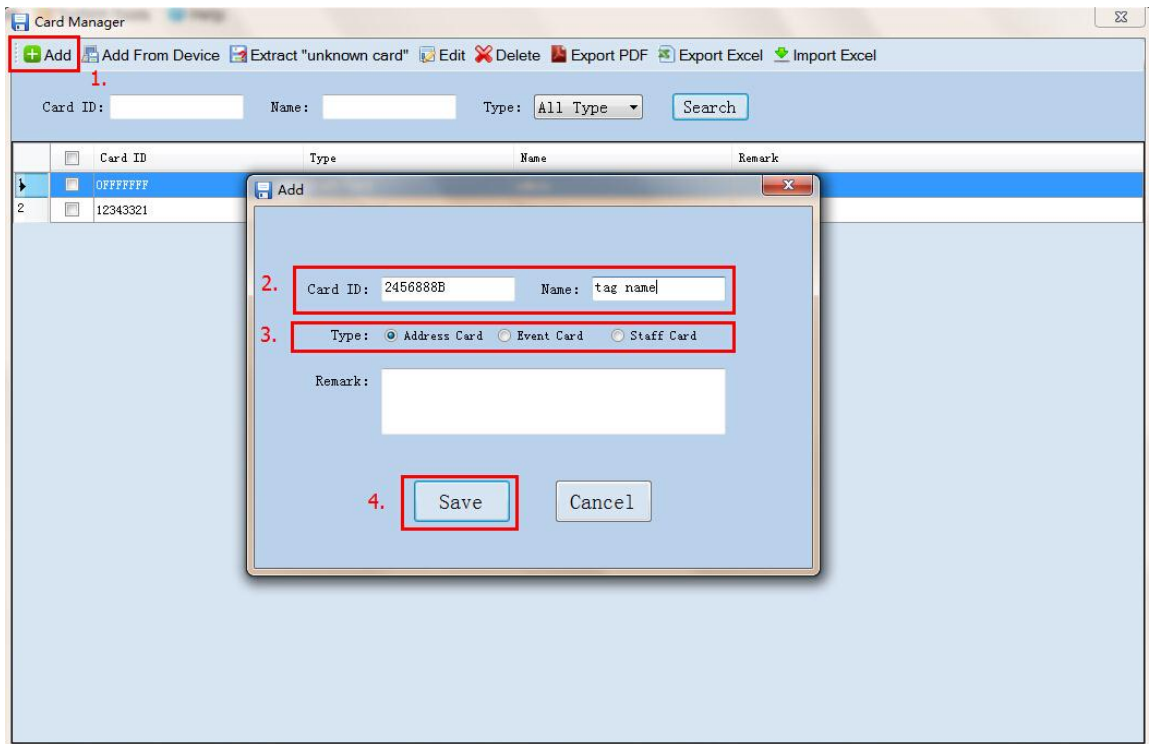

### 8.1 .Card setup

There are two way to set up tags (check point , staff ID card , event card ) :

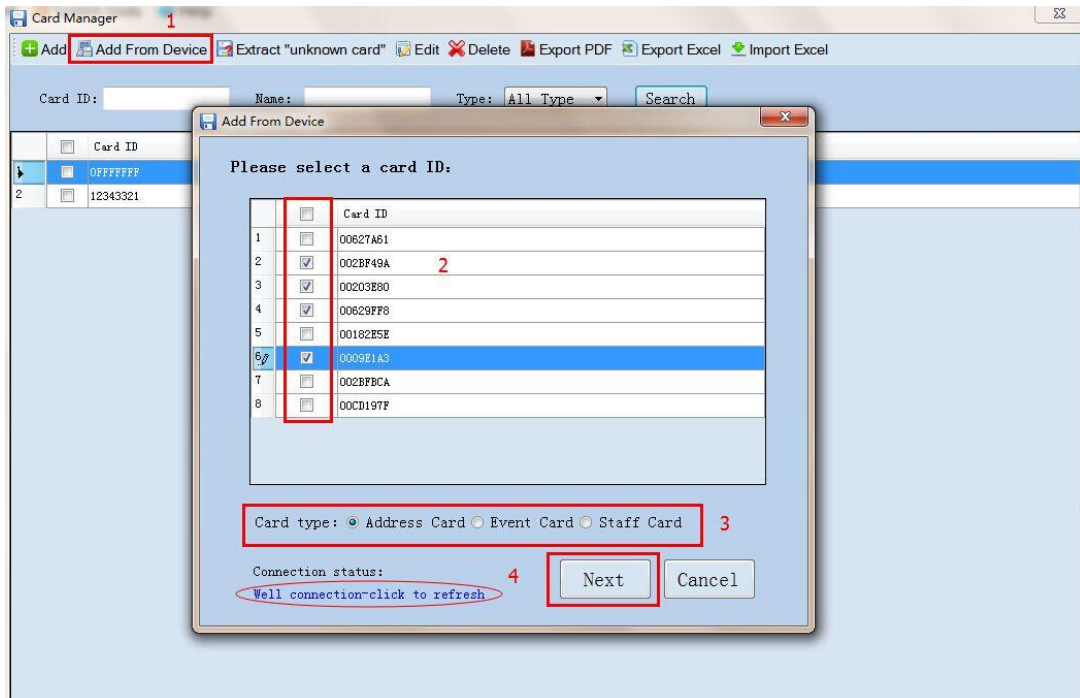

- A. Add manually (this method cost much time and easy making mistake )
- B. Add from device (this method recommended . Please read tags with patrol device in order , this will make “ register new tags “ very easy and efficient) .
- C. Extract “Unknown card” (this method recommended . Every time when you connect patrol device with software , software will save all cards automatically to database including “ Unknown card ”, when you click **Extract “Unknown card”** ,all unknown card saved in software will be displayed in list ) .

1. Add manually :

---

2. Add from device : Please read all should registered card with patrol device in order in advance . Software will show all card with reading time order , also the device must be connected with software when you do this . You can register new card under communication interface or this interface by clicking **Add From Device** . If not work ,please check whether device is well connected with software , you can click” No device detected- click to refresh” **No device detected-click to refresh** to refresh connection .

3. Extract “Unknown card ”: You can operate this button even while device is connected with software or not connected . If there is device connected with software, all card saved in database (including all patrol device connected with software ) and current unknown card saved in patrol device will all displayed in list . If no device connected with software , all unknown card from previous device will be displayed in list .

If you save some tags wrongly, you can also click “delete ” to remove from the list you want to save

**Add From Device**

Please add card information:

	Card ID	Type	Name	Remark	
1	0064968D	Address Card	write name here		Delete
2	0062AE14	Address Card			Delete
3	0062AAA0	Address Card			Delete
4	0062CFE6	Address Card			Delete
5	00CD197F	Address Card			Delete
6	002CF631	Address Card			Delete
7	000D9766	Address Card			Delete

**Save** **Cancel**

While your first time to connect device with software, and if there is none card registered , software will prompt “Extract from current device ?” , you can extract card from device and register them to software directly. You can also clear all data from software by clicking

[Clear all data from device](#)

**Card Manager**

[Add](#)
[Add From Device](#)
[Extract "unknown card"](#)
[Edit](#)
[Delete](#)
[Export PDF](#)
[Export Excel](#)
[Import Excel](#)
[Clear all data from device](#)

Card ID:  Name:  Type:

	Card ID	Type	Name	Remark
1	0FFFFFFF	Staff card	admin	

**Information**

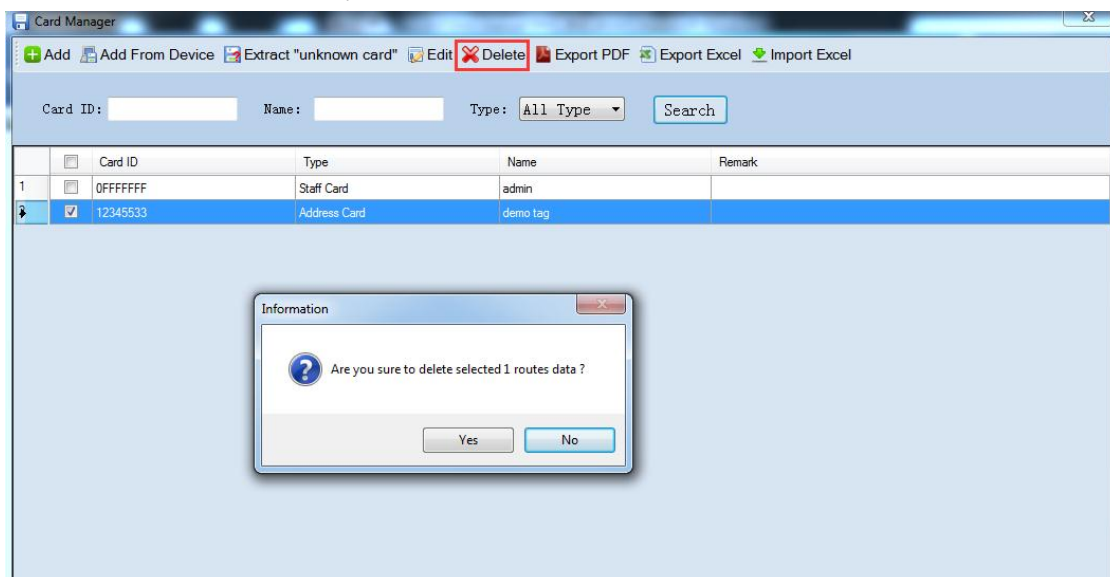

Extract card from current device?

**Yes** **No**

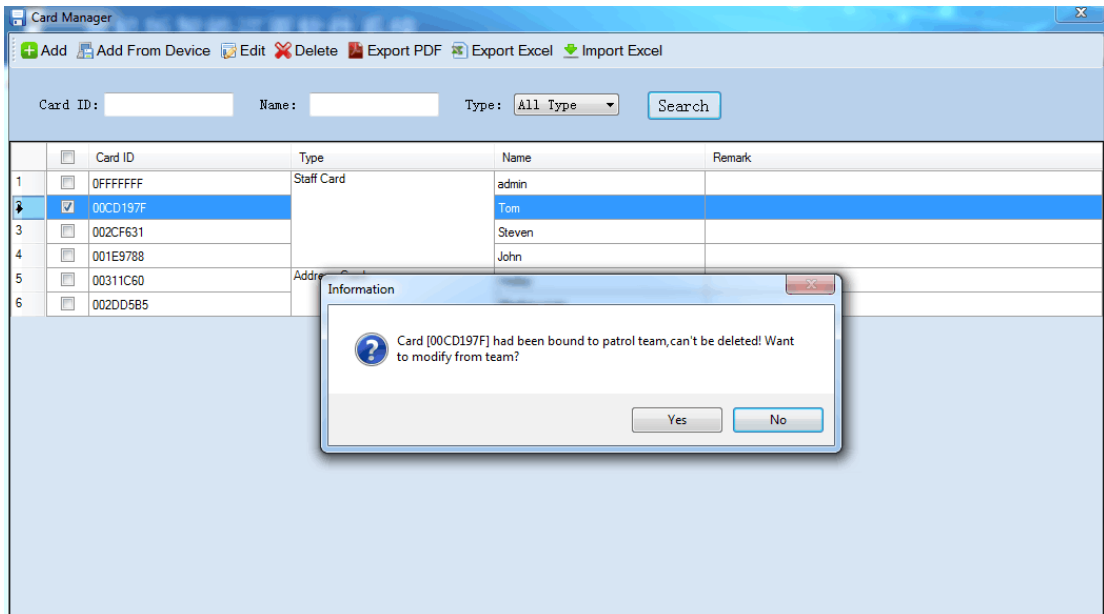

3. Modify card : If you want to modify existing card information, please tick the card and click “edit ” for modification (you can modify card ID or card name , remark or card type).

4. Delete card : Please tick the card you want to delete , click “ delete ” and “OK” to delete .

\*Notice : If show this prompt , please go to the related patrol route and patrol schedule , then you can delete card .

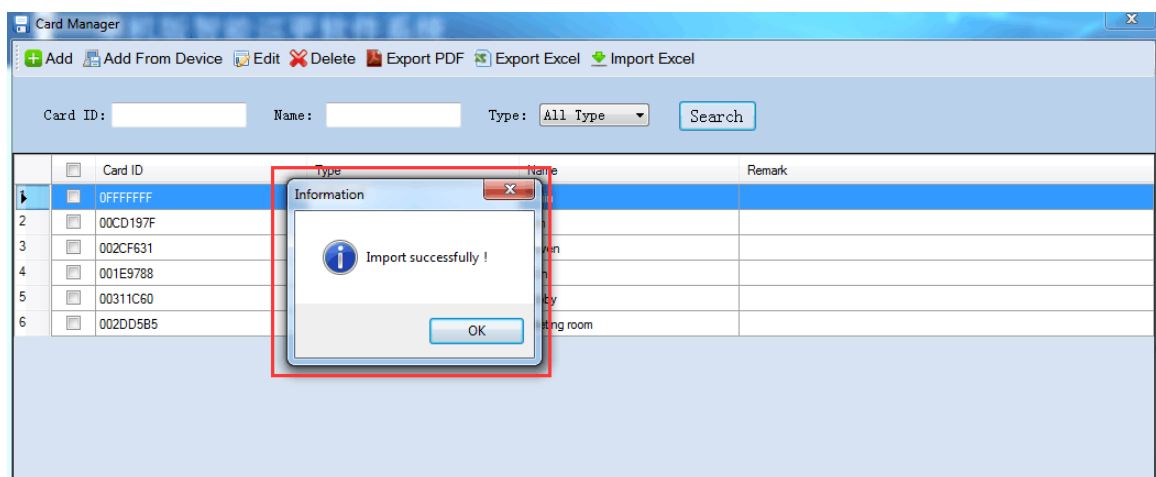

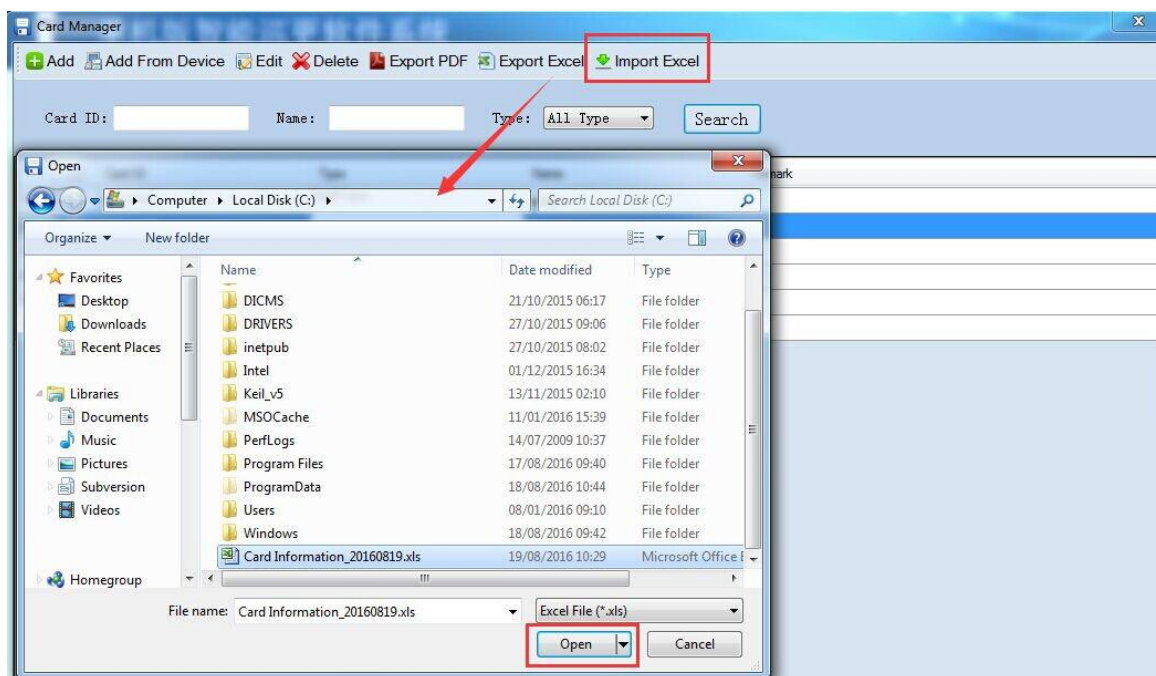

5. Export card list : You can export “pdf” and “ Excel ” format .

G5				
	A	B	C	D
1	Card Information			
2	Card ID	Type	Name	Remark
3	0FFFFFFF	Staff Card	admin	
4	00CD197F	Staff Card	Tom	
5	002CF631	Staff Card	Steven	
6	001E9788	Staff Card	John	
7	00311C60	Address Card	Hobby	
8	002DD5B5	Address Card	Meeting room	
9				
10				

6. If much card should be added to software, you can make a “Excel” table which including all card (Because there is format limit , the title of Excel must be the same with the exported one ,please export an Excel from software for reference to see the format , then fill in all information follow the exported Excel , or will be invalid ).

7. Query card information : You can query card by “Card ID ” , “ Card name ” , “Card type” to search the card you want

Card Manager

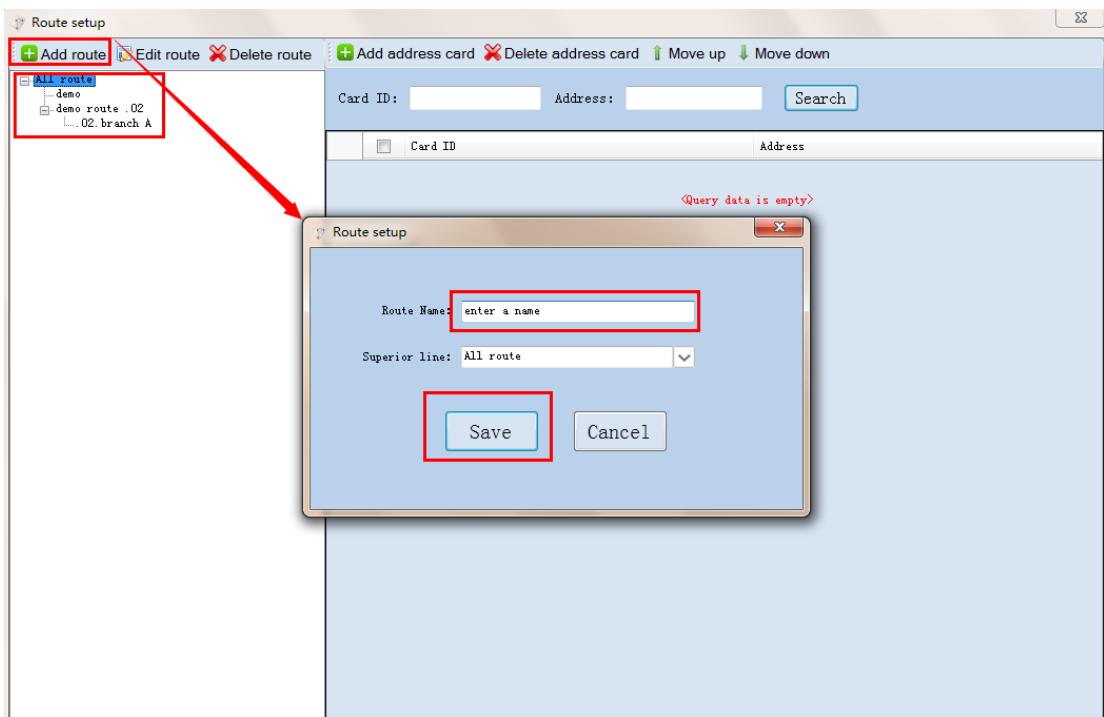

➕ Add ➡ Add From Device ✎ Edit ✖ Delete 📄 Export PDF 📊 Export Excel 📥 Import Excel

Card ID: 0064968C Name: Type: All Type Search

	<input type="checkbox"/>	Card ID	Type	Name	Remark

2	<input checked="" type="checkbox"/>	0064968C	Address Card	write name here	
3	<input type="checkbox"/>	0062AE14		2F	

## 8.2 Route setup

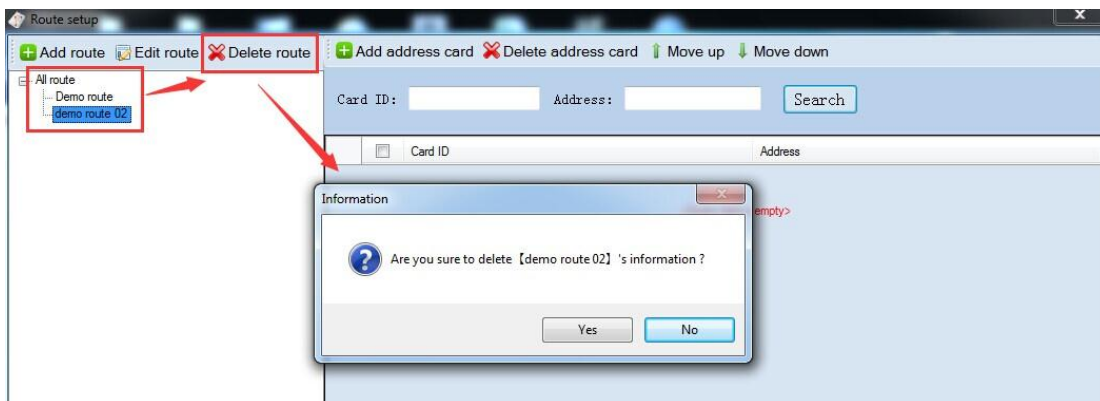

1. Create a new route : Default is all route displayed here . If you want to create a new route , please select a parent node first then click “add ” --- Enter route name --- Save .

2. Edit route name : If you want to modify route name , click “ edit ” for modification .

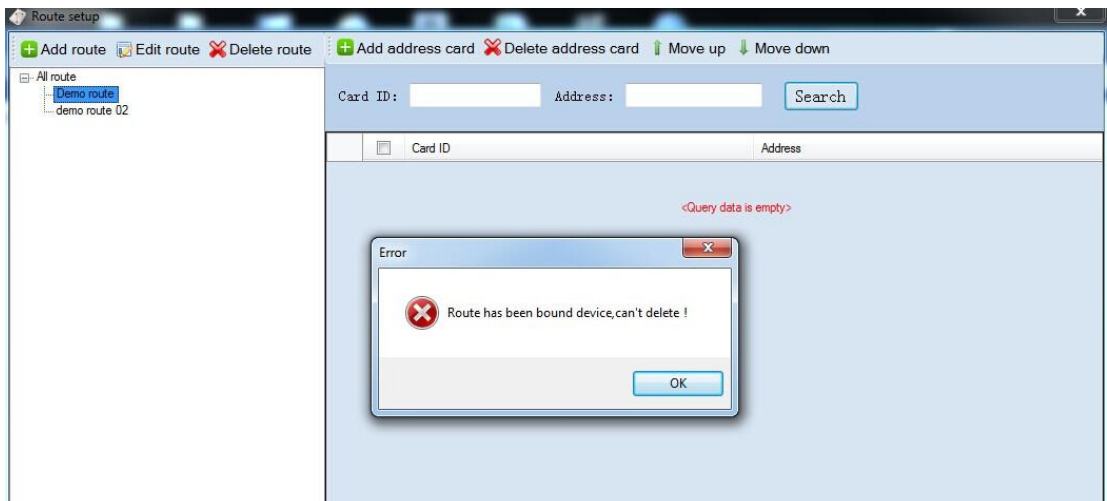

3. Delete route : Select route --- Click “ delete ” to delete patrol route .

Notice : If some device is bounded to your selected route , or there are some check point are bounded to your selected route , or there are schedule existed in your selected route ,system will not allow you to delete device , please go to communication interface first to change device's binding route , or delete check point from selected route, or delete schedule from selected route , then you can delete this route .

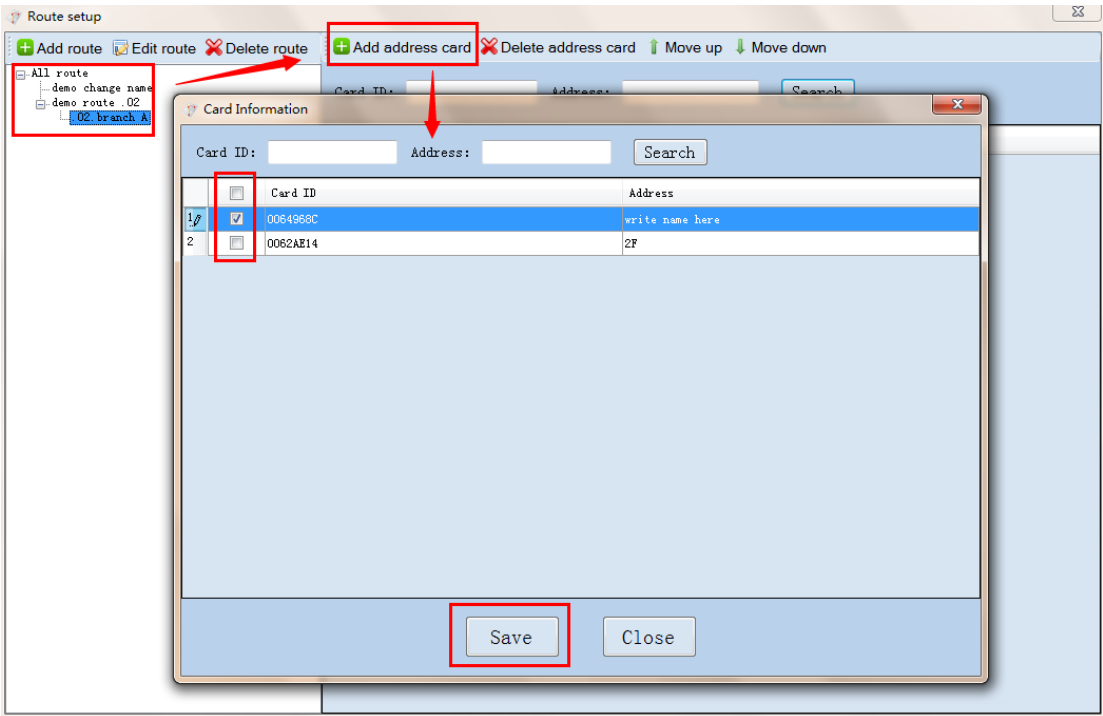

4. When you click route name , if right box show <NO DATA> , which means no any check point under this patrol route.

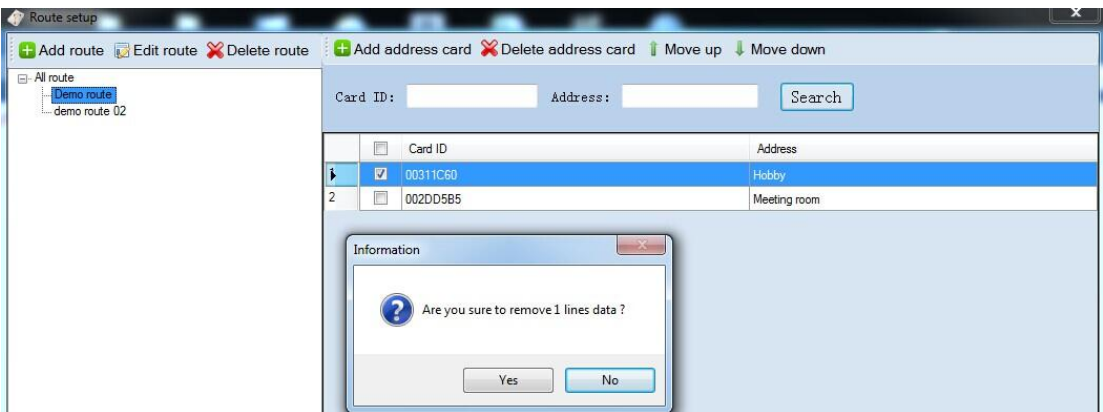

5. Add card to patrol route : Select patrol route --- Click “add ”--- Select card --- Click “Save ”. Tick all , you can

select all card , click “Close ” can close window .

If you want to query some specified card, you can query with Card ID or name here to find and add them soon .

6. Delete card from patrol route : Select patrol route --- Tick card you want to delete--- Click “ delete address card ” .

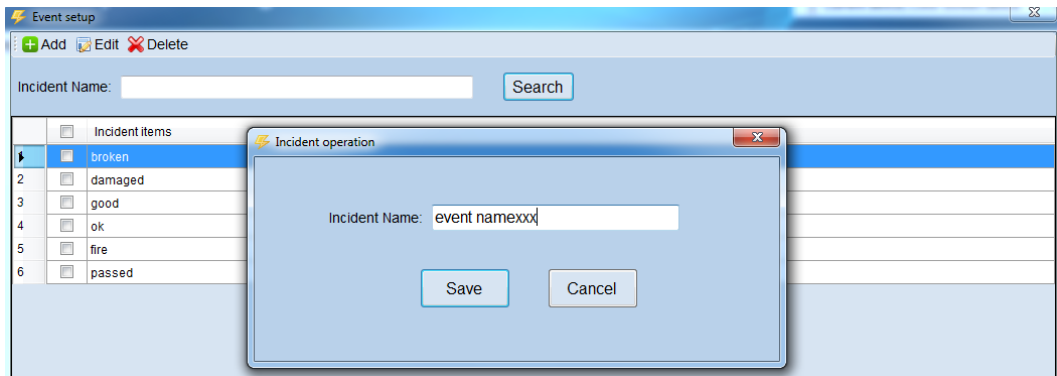

7. “Up” “Down” : Click “Move up” or “ Move down” to move cards order . (\* check point ranking order here is

the patrol order security officer should followed . Please be noted in case of data disorder) .

**[Events setup for device with event function]**

1. If your device are with the function to record event, you can add event to assigned check spot /address . In

addition, there are fingerprint verification for each check spot /address . If you tick “ Ask fingerprint” , then every time when patrol staff arrived to related location ,device will prompt “please touch fingerprint ” (Fingerprint verification are only for device with fingerprint function ).

### 8.3 Team setup

This function is use for manage patrol officer . For example , if there are 2 shift for patrol working : morning shift and night shift , 3 officer at morning shift , 4 officer at night shift . You can manage their information here .

1.Create a new team

1. Select the parent team --- Click “Add team ”--- Enter team name --- Save

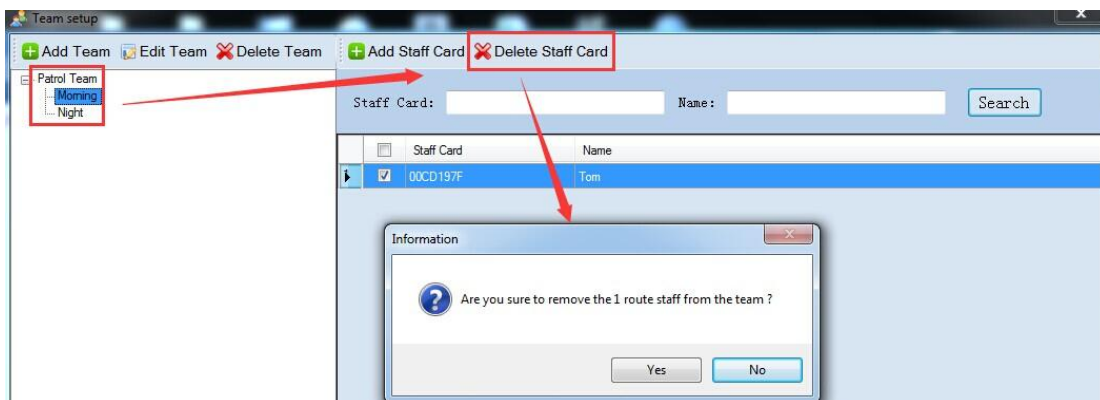

2. You can edit team or delete team information by click these

3. Add inspector to related patrol team : Select patrol team --- Click “Add staff card ” --- Tick staff card you want to add --- Click “Save” .

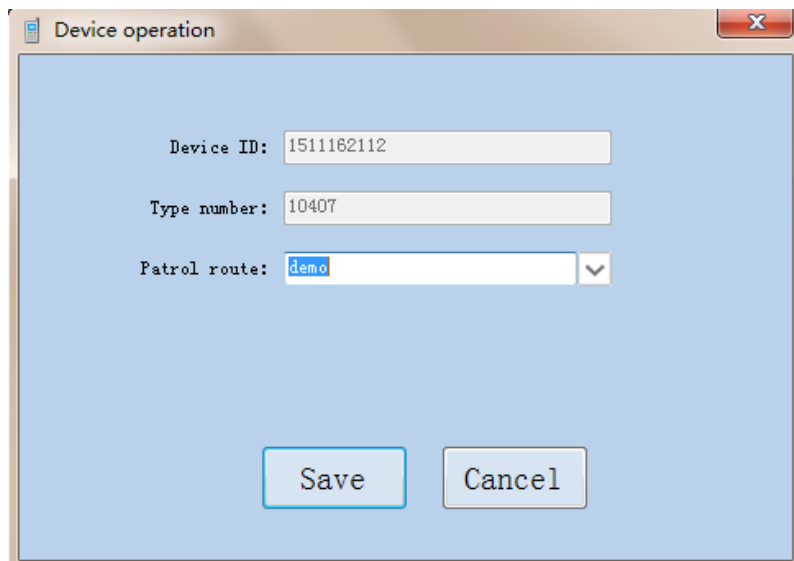

4. Delete inspector from existing patrol route

5. Query : You can query the inspector by staff card ID or name .

#### 8.4. Device setup

1. Edit device information (you can change device binding from one route to another route).

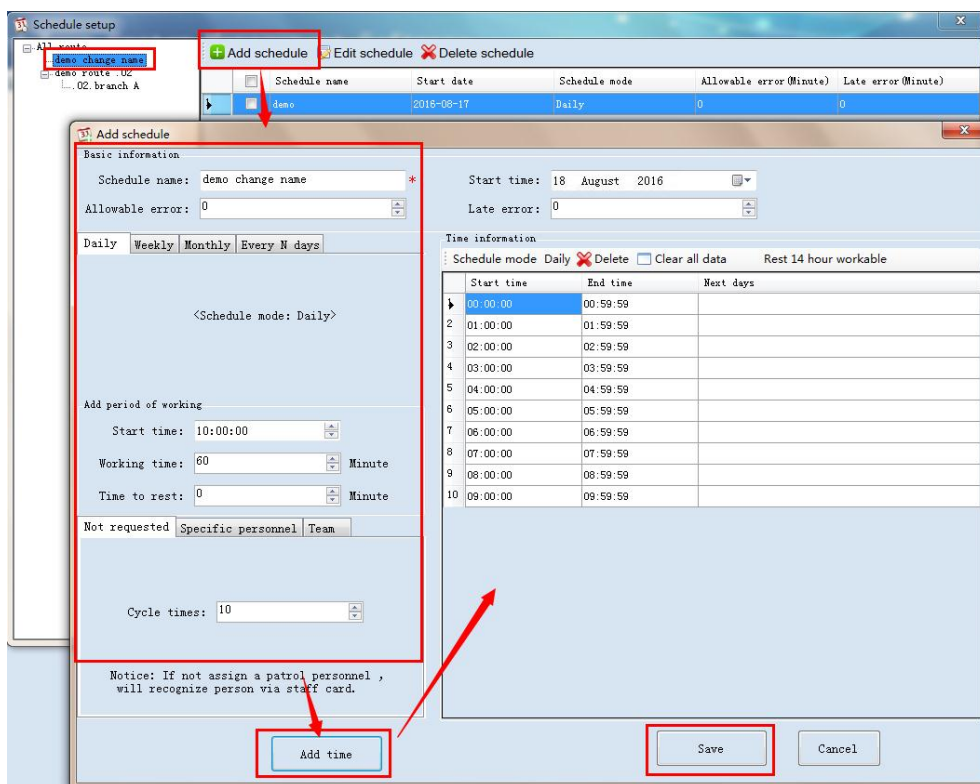

2. Delete device information : Select device and click “ delete” , you can delete device from software (this also means cancel device binding from patrol route ) .

3. Query device information : You can query device information by device ID , belonging route name and type ID .

## 8.5. Event setup

1. Create schedule : Select patrol route --- click “ Add schedule ”--- Enter schedule time and other basic information --- click “add time ”--- click “Save ”.

### (1) Basic information of schedule

- Schedule name : The name of schedule . \* **required**
- Start time: The execution time of this schedule
- Allowable error : If actual patrol time is within the allowable error you set, the result will be regarded as no problem . For example : if a schedule time is from 8:00 to 10:00 am , the “allowable error ” is 5 minutes , so the actual patrol time from 07:55-10:05 are all no problem ,regarded as “Qualified ”

- Late error : If a schedule is from 8:00-10:00am , the “late error” is 10 minutes , so the actual patrol time from 10:05-10:10 will be regarded as “Late” .Please be noted that “Late error ” must be larger than “allowable error” .

Basic information

Schedule name:	<input type="text" value="Demo route"/>	*	Start time:	<input type="text" value="18 August 2016"/>
Allowable error:	<input type="text" value="1"/>		Late error:	<input type="text" value="3"/>

## (2) Add patrol time

- Patrol period selection : Set the execute patrol period of your schedule

**Daily** Weekly Monthly Every N days

Week selection

<input checked="" type="checkbox"/> Monday	<input checked="" type="checkbox"/> Tuesday	<input checked="" type="checkbox"/> Wednesday	<input checked="" type="checkbox"/> Thursday

Statistics:

Number of qualified: 6

Number of late: 2

Missing quantity: 152

Percent of qualified(%): 3.75%

Percent of late(%): 1.25%

Percent of missing (%): 95%

Notice : If there are multiple record during querying patrol period , system will just extract the earliest patrol time . If patrol person and scheduled person is the same one , the “Qualified ” result is in black color . If scheduled person and patrol person is not the same one , the “Qualified ” result will be in “Blue color ”.

Result judgement standard :

**Qualified** : If the patrol time is from 8:00-9:00 , the allowable error is 5 minutes , so the data at the time 07:55 to 09:05 will be judged as “Qualified ” .

**Late** : If the patrol time is from 8:00-9:00 , the late error is 10 minutes , so the data at the time 09:05 -09:10 will be judged as “late” .

**Miss** : The data beyond scheduled patrol time . If the schedule patrol time is 8:00-9:00, allowable error is 5 minutes , late error is 10 minutes , the data after time 09:10 will be judged as “Miss ”

➤ **Using time** : processing bar show data processing .Using time is the time-consuming for full data processing .

Reading finished!Using time: 1.198s Total record: 651

Export Excel Export PDF

Error time: The patrol time result error . If multiple record of the same day , same place within the error time , will be counted once only . If “error time” is 0, all recorded data in device of scheduled check point will all displayed here .

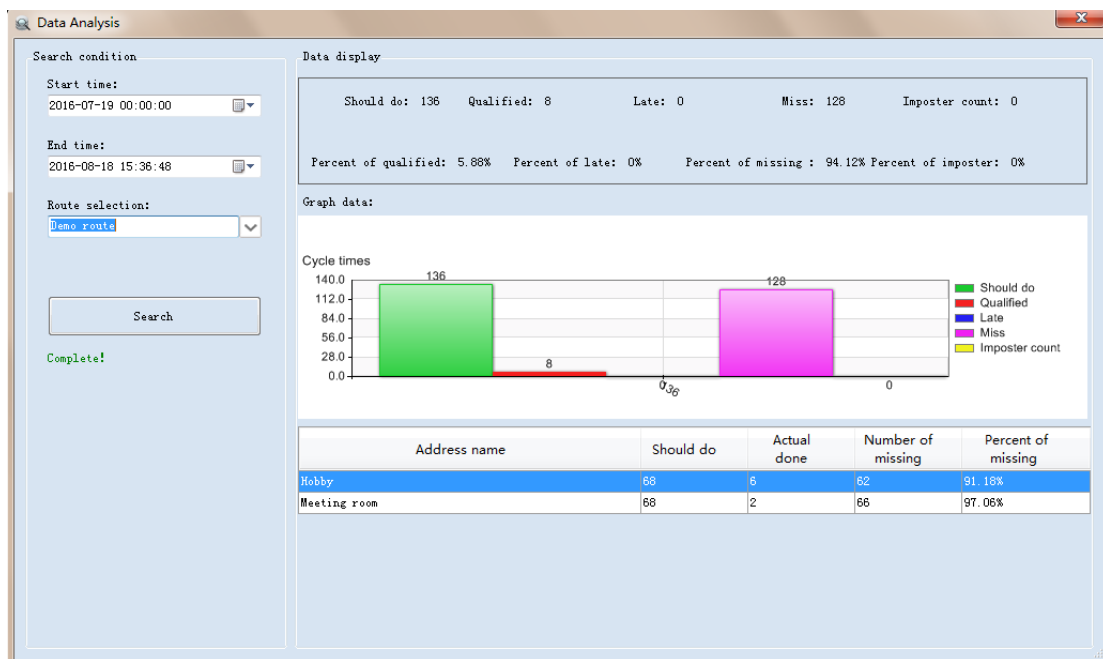

The first time appear on the time list will be regarded as the first time , 5 minutes error is based on the first time one, till the second valid time listed out, 5 minutes error superposed again , till the third time...

For example , if the “error time ” is 5 minutes , the first reading time recorded is 10:01, so the time within 10:01-10:06 will be ignored till the next data appear which beyond time 10:06, below picture time is 10:10, if data within 10:10-10:05, will be ignored and only 10:10 left , till the next data time 10:30 appeared , if data within 10:30-10:35, will be ignored and only 10:30 left ,till the next piece of data time 10:50 appeared .

2. Export PDF and Excel : You can click “Export Excel” or Export PDF ” to save these file to your computer .

## 9.4 Data Analysis

Query the data statistics chart as your time condition

1. Full in the search condition and click “Search” to query the result .As below picture

**Should do :** The patrol quantity should to do , this is calculated based on generated patrol schedule

**Actual done:** The actually patrol did ("Qualified data ) or also "Qualified data " and "Late data" (if "late error" ) . **If multiple data existed at the same patrol period for the same location, will be counted once only .**

**Qualified :** "Qualified data " at the scheduled patrol period ( these data result are the same as in "Data result "report ) .

**Late :** "Late data " at the scheduled patrol period . ( these data result are the same as in "Data result "report ) .

**Miss :** "Miss data " at the scheduled patrol period .( these data result are the same as in "Data result "report ) .

**Imposter count :** Result calculate for the "imposter data" .

## 9.5 Impact record

You can query the impact record data stored in the patrol device under your query date condition. The data displayed here are the same as the one under “Data communication” - “Impact record” .

Please note the search date selection ,if no impact record generated under your search date condition, there will be

nothing displayed here .

## 10. System tools

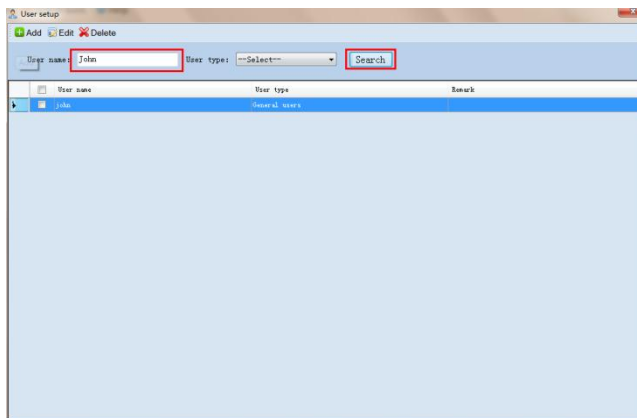

### 10.1 User setup

There are 3 types user can be created : Super administrator , Administrator , General users

You can Create new user, Edit or delete user , Query use with user name or user type .

1. Query : Type user name or select user type to query、

2. Add user

#### ■ User type explanation

3 types user : Super administrator (**Admin** , default by system ) , Administrator , General user.

**Super administrator** : There is only one Super administrator allowed in this system , its "**Admin**". It with all permission for software .

**Administrator ,General user** : No much permission difference just Administrator can create "Administrator" and "General User". General user can only create "General user" .

#### Notice :

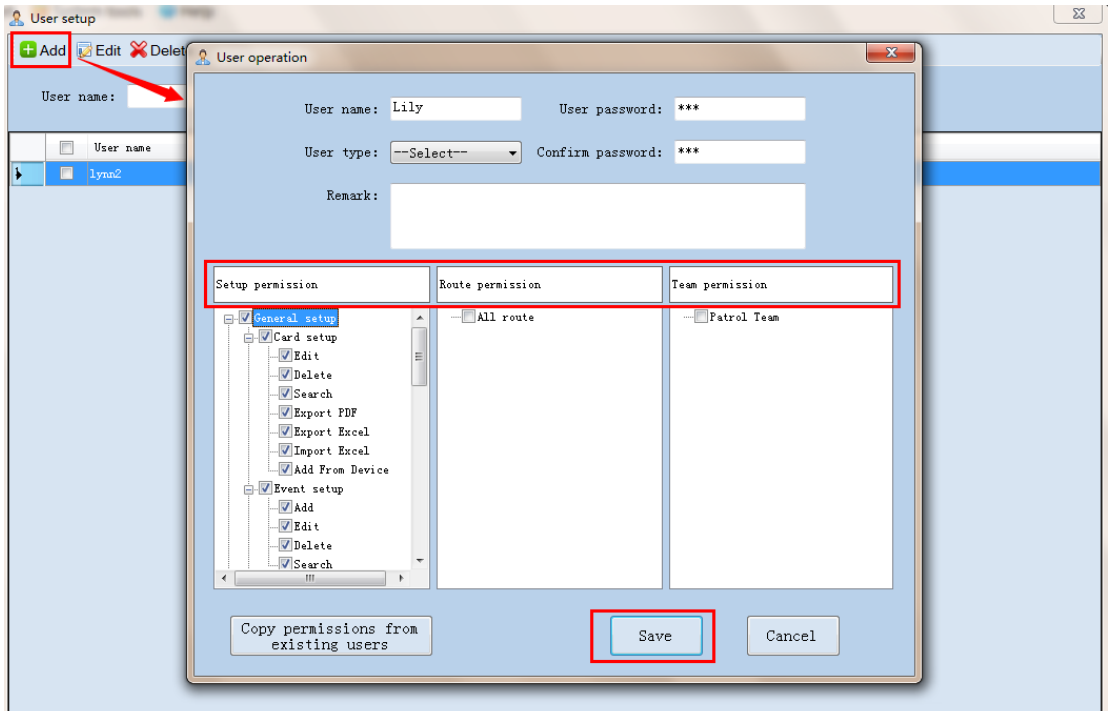

- (1) When creating new user , can only create General user or Administrator user .
- (2) **Admin** is the system default user account .
- (3) Default password is "123", suggest you to change **Admin** password timely .

(1.) Fill in basic user information (User name , password , user type and operation permission for software .

There are 2 types user can be created “Administrator ” or “General users” . The difference of General user and Administrator is Administrator can create “Administrator ” and “General User ” . General user can only create “General user ” .

There is only one “Super administrator ” allowed , the system default one, can only change the password , and change the operation permission. This account is can't be deleted or change name and user type. “Super administrator ” with the highest permission to set all account .

#### ■ Operation permission

Three main operation permission : Setup permission , Route permission, Team permission .As below picture

If not tick the permission option for specified , when the user log in system with his account and operate the related interface , system will show message “ You have no permissions for xx operation ! ”. As below picture :

#### ■ Authorization explain

- ◆ All user (Admin not included ) permission are authorized by who created them ;
- ◆ The creator's authorization permission can't beyond what themselves with;

A . For example : Sam with below permission , so the user created by Sam can only with the permission not beyond what Sam with .

As below picture, Sam is without “ Route permission ”, so the user created by Sam should also without this permission .

Notice : The permission the creator must have is “ User setup (Add) ” .

User operation

User name:  User password:

User type:  Confirm password:

Remark:

Setup permission	Route permission	Team permission
<input checked="" type="checkbox"/> System tools <ul style="list-style-type: none"> <li><input type="checkbox"/> User setup <ul style="list-style-type: none"> <li><input type="checkbox"/> Add</li> <li><input type="checkbox"/> Edit</li> <li><input type="checkbox"/> Delete</li> <li><input type="checkbox"/> Search</li> </ul> </li> <li><input checked="" type="checkbox"/> System resetting</li> <li><input checked="" type="checkbox"/> OK</li> </ul>	<input checked="" type="checkbox"/> All route <ul style="list-style-type: none"> <li><input type="checkbox"/> demo</li> </ul>	<input checked="" type="checkbox"/> Patrol Team

Copy permissions from existing users Save Cancel

B. User type can be created : If Sam is “ Administrator ” , he can create a new user with type “Administrator” or “General User” . If Sam is “General User”, he can only create “General User ” also ,can not beyond Sam’s type .

◆ Creator can query , edit and delete the user information which created by them . If not create user, they can only see themselves information .

◆ User can not extend their operation permission only if apply to the creator who created them .

For example , if user “Sam” is created by “Devin”, Sam can only extend his operation permission by applying to Devin.

## 10.2 System resetting

Select the part should be reset , click “OK” to clear information from software (Select you to choose “ Clear parts”

to select what you want to delete. Please backup data before resetting , or data will not recovered again).

System resetting

Type:

☐ Clear all Settings

☒ Clear parts (recommended)

Options:

☒ Patrol team

☐ Patrol route

☐ Device list

☒ Address list

☐ Staff list

☐ Event card list

☒ Event list

☐ Patrol schedule

☐ Raw data

Notice: Please backup software setting first before resetting!

#### 10.4. Data backup

- Start backup: Backup the current software database to your specified path

- Data recovery: You can recover any existed backup from your storage path (Including all software setting , data stored in previous database).
- Data backup period: There are 4 types backup period “Daily” “Weekly” “Monthly” “Every quarter” Once click “Auto backup”, software will backup the database automatically as your specified period.
- Default backup folder: Display where is the current database “bak” storing path.
- Specify backup folder : Click to modify the database storage file , you can it put to the location you want .

The screenshot shows a configuration window with a light blue background. At the top, it says "Data backup period:" followed by four radio buttons: "Daily" (selected), "Weekly", "Monthly", and "Every quarter". Below this is a button labeled "Auto backup". Underneath the button, there are two text input fields. The first is labeled "Default backup folder:" and contains the text "E: \patrol\_18.2\Patrol\Bak". The second is labeled "Other backup folder:" and is currently empty. To the right of the "Other backup folder:" field is a blue button with the text "Change" in red, which is highlighted by a red rectangular box.

**\*\* For data safety , please not put data backup in “C” disk.**
